Williams III,Daniel A. Davis Jr.,Dave A. Miller,2022-05-19 The objective of this third edition is to consolidate within a single text the most current knowledge practical methods and regulatory considerations pertaining to formulations development with poorly water soluble molecules A pharmaceutical scientist s approach toward solubility enhancement of a poorly water soluble molecule typically includes

detailed characterization of the compound's physiochemical properties solid state modifications advanced formulation design non conventional process technologies advanced analytical characterization and specialized product performance analysis techniques. The scientist must also be aware of the unique regulatory considerations pertaining to the non conventional approaches often utilized for poorly water soluble drugs. One faced with the challenge of developing a drug product from a poorly soluble compound must possess at a minimum a working knowledge of each of the above mentioned facets and detailed knowledge of most. In light of the magnitude of the growing solubility problem to drug development this is a significant burden especially when considering that knowledge in most of these areas is relatively new and continues to develop.

Refractive Surgery for High Myopia J. Bradley Randleman, 2023-10-12 The incidence and prevalence of high myopia has increased significantly over the past decade and is expected to more than double over the next 20 years. These patients are more impacted by their vision than patients with lower refractive errors and also have more limited safe and effective treatment options available to them. Fortunately recent developments in the field have improved refractive surgery screening to improve safety and new surgical options are now available specifically to address these more complex refractive errors. The book will address the unique challenges presented by patients with high myopia and cover the pros and cons of current treatment options. The book will also feature case studies with detailed images and tables. In addition the book will discuss promising future options currently in development. Refractive Surgery for High Myopia is a must have resource for ophthalmologists refractive surgeons residents and fellows.

*The Hospital Neurology Book* Arash Salardini, Jose Biller, 2016-04-22 A practical protocol oriented guide to the practice of neurology in the hospital setting. A Doody's Core Title for 2019 Hospital neurology is one of the fastest growing subspecialties within neurology. Running an efficient and effective neurohospitalist line is important to the financial success of hospitals and the physicians employed there. Many neurology patients also have internal medicine problems and often it is a general hospitalist without neurology training who treat these patients. These physicians sorely need more information on neurology. Conversely neurologists caring for these patients have only had one year of internal medicine training and require more guidance on medical problems. Given these realities there is a need for a resource on hospital neurology. With *The Hospital Neurology Book* Drs Salardini and Biller have created a

practical concise and useful work that guides both neurologists and internists in the areas in which their training is currently not sufficient for hospital practice The Hospital Neurology Book features a highly readable format providing information physicians can act upon including recipes and protocols for patient care and question based chapter headings that lead physicians to the exact issue they are dealing with in the moment Each chapter or chapter section as appropriate opens with a case study setting the stage in a highly practical manner and ends with high yield summary points useful for consolidating learning *Investigative Ophthalmology & Visual Science*, 2002 *Serials in the British Library*, 2008
