### **Fostering Transformative Research in the Geographical**

**Sciences** National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Geographical Sciences Committee, Committee on Identifying Transformative Research in the Geographical Sciences, 2019-04-22 The central purpose of all research is to create new knowledge In the geographical sciences this is driven by a desire to create new knowledge about the relations between space place and the anthropogenic and non anthropogenic features and processes of the Earth But some research goes beyond these modest aims and creates new opportunities for further research or affects the process of knowledge acquisition more broadly or changes the way other researchers in a domain think about the world and go about their business Due to its positive impacts transformative research can be regarded as inherently having greater value than more conventional research and funding agencies clearly regard transformative research as something to be encouraged and funded through special programs Assessments of transformative research funding initiatives are few and provide a mixed picture of their effectiveness The challenge is whether transformative research can be identified at the time it is proposed rather than after it has been conducted communicated and its influence on the discipline has become clear Fostering Transformative Research in the Geographical Sciences reviews how transformative research has emerged in the past what its early markers were and makes recommendations for how it can be nurtured in the future

21st Century Geography Joseph P. Stoltman, 2012 This is a theoretical and practical guide on how to undertake and navigate advanced research in the arts humanities and social sciences

Political Geography Colin Flint, Peter J. Taylor, 2025-04-04 The new and updated eighth edition of Political Geography once again shows itself fit to tackle a frequently and rapidly changing geopolitical landscape It retains the intellectual clarity rigour and vision of previous editions based upon its world systems approach and is complemented by the perspective of feminist geography The book successfully integrates the complexity of individuals with the complexity of the world economy by merging the compatible but different research agendas of the co authors This edition explores political geography within the context of US China competition Russia's war with Ukraine global climate change new technologies and challenges to democracy It advances the discussion from the previous editions on the dynamics of the capitalist world economy and the constant tension between the global scale of economic processes and the territorialization of politics in the current context of geopolitical change The chapters have been updated with new examples new sections on global climate change populism and the growing threat of global war The book offers a framework to help students make their own judgements of how we got where we are today and what may or should be done about it Political Geography remains a core

text for students of political geography geopolitics international relations and political science as well as more broadly across human geography and the social sciences *The Routledge Handbook of Mobilities* Peter Adey, David Bissell, Kevin Hannam, Peter Merriman, Mimi Sheller, 2014-01-10 The 21st century seems to be on the move perhaps even more so than the last With cheap travel and more than two billion cars projected worldwide for 2030 And yet all this mobility is happening incredibly unevenly at different paces and intensities with varying impacts and consequences to the extent that life on the move might be actually quite difficult to sustain environmentally socially and ethically As a result mobility has become a keyword of the social sciences delineating a new domain of concepts approaches methodologies and techniques which seek to understand the character and quality of these trends This Handbook explores and critically evaluates the debates approaches controversies and methodologies inherent to this rapidly expanding discipline It brings together leading specialists from range of backgrounds and geographical regions to provide an authoritative and comprehensive overview of this field conveying cutting edge research in an accessible way whilst giving detailed grounding in the evolution of past debates on mobilities It illustrates disciplinary trends and pathways from migration studies and transport history to communications research featuring methodological innovations and developments and conceptual histories from feminist theory to tourist studies It explores the dominant figures of mobility from children to soldiers and the mobility impaired the disparate materialities of mobility such as flows of water and waste to the vectors of viruses key infrastructures such as logistics systems to the informal services of megacity slums and the important mobility events around which our world turns from going on vacation to the commute to the catastrophic disruption of mobility systems The text is forward thinking projecting the future of mobilities as they might be lived transformed and studied and possibly brought to an end International in focus the book transcends disciplinary and national boundaries to explore mobilities as they are understood from different perspectives different fields countries and standpoints This is an invaluable resource for all those with an interest in mobility across disciplinary boundaries and areas of study **Managing Adaptation to Climate Risk** Geoff O'Brien, Phil O'Keefe, 2013-07-24 Resilience has become the new buzz word in Government Health Energy and Disaster Management sectors Climate change is the single largest threat to sustainable development and addressing climate risk is a challenge for all This book calls for greater collaboration between climate communities and disaster development communities to tackle the challenges faced in addressing climate risk reduction It evaluates approaches used by each community to reduce the adverse effects of climate change and argues that adaptation focused on peoples livelihoods rather than technology is the best way to reduce risk One area that offers some promise for bringing together these communities is through the concept of resilience a process that embeds capacity to respond to and cope with disruptive events The book explores various models of resilience and concludes by evaluating the scope for a holistic approach where these communities can build communities resilient to climate driven risks Managing Adaptation to Climate Risk provides a conceptual

framework for future debate and will be of interest to students and researchers in Development Studies Environmental Studies and Disaster Risk Reduction

**The Global Challenge and Marginalization** Márcio Moraes Valença, 2008

Marginality is often seen as a reflection of division in which there is an unequal relationship of economic and political power between two extremes In this way it is a common thing to find oppositional couples like North South Rich Poor Homogenous Heterogenous Centre Periphery Inclusion Exclusion Developed Underdeveloped and New Old in much of the literature dealing with marginality These oppositions come about out of a socially and politically unbalanced society which is organised according to the differentiation of individuals in a hierarchical exclusionary fashion In this book there are 25 chapters written by 36 academics from 27 universities located in 14 countries and in 4 continents on this fascinating subject matter

*The Library as Place* John E. Buschman, Gloria J. Leckie, 2007
