A Study & Review of the Economic and Social Benefits of Pets in Ontario Ontario Veterinary Association,1983 *Literature Review of the Psychological Aspects of Pet Ownership* Pet Food Institute,1976 **Review of Cost-benefit Assessment in the Use of Animals in Research** Great Britain. Home Office. Communication Directorate (GB); Great Britain. Home Office. Animal Procedures Committee (GB),2003 *An Evaluation of the Benefits of Animal Assisted Therapy* ,2005

Reliable information on the benefits and uses of Animal Assisted Therapy AAT is minimal Many studies that have evaluated the implications for AAT have been descriptive and anecdotal in nature rather than quantitative and those who have used a quantitative method have typically had very small non random samples of participants This makes it very difficult to generalize the resulting benefits to a larger population The main objective of this critical review is to analyze the implications for the use of AAT with individuals from a variety of populations A secondary objective is to determine what types of animals work most effectively with specific populations receiving Animal Assisted Therapy The available research suggests that AAT has both physiological and psychological benefits for individuals with a variety of impairments or disabilities This review of the literature focuses on the use of AAT with children and adolescents older adults individuals with developmental and physical impairments the mentally ill and the incarcerated In order to determine which animals are most effective with individuals from specific populations more research comparing the effects of different animals on these populations needs to be done
