

A vibrant, colorful Roblox cityscape. In the foreground, a large red rocket ship with a glowing orange base is positioned on a green platform. To the left, a yellow construction crane with a blue bucket is working on a building. The city features various green-roofed buildings, some with blue and white accents. The sky is a bright blue with white clouds. The overall aesthetic is a mix of industrial and futuristic elements.

Engagement Design Nelson Zagalo, 2020-03-17

Interactive media designers have been discussing modes to optimize interaction design beyond mere usability. With the arrival of Emotional Design followed by the success of the User Experience (UX) approaches, the discussion continued and Augmented Experience has become a complex buzzword which is more about the subject's experience than the product and this is why it's difficult or even impossible to define it in a concise manner. We propose to move the discussion from Experience towards Engagement to emphasize the design of the relationship between artefacts, contexts, and users. Engagement asks for a more concrete type of experience with specific needs, motives, skills, and competences which can be more clearly worked into the design of artefacts. Engagement also differs from other concepts, e.g., fun, enjoyment, happiness, or well-being, and is open enough to grant freedom to designers in creating their personal world views. To push this new approach, we offer in this book a full model for the design of engagement in interactive media, still believing it can be applied beyond that. The model is arranged around what we call the three engagement streams: Progression, Expression, and Relation.
