Food-Based Dietary Guidelines: The Relevance of Nutrient Density and a Healthy Diet Score Ellen G. H. M. Van Den Heuvel, Lisette Cornelia Petronella Gerardina Maria De Groot, Monique Maria Raats, Jan Steijns, Edith Feskens, Inge Tetens, 2021-02-02

Food and Nutrition Danielle Gallegos, Mark L Wahlqvist, 2020-07-27 Food how we produce prepare share and consume it is fundamental to our wellbeing It also connects the human body to the complex and dynamic systems of our environment This is more significant than ever before in human history as climate change and increasing population impact on global ecosystems This fourth edition of Food and Nutrition has been completely rewritten to reflect an ecosystems approach to human health It is shaped around four dimensions of human nutrition biology society environment and economy Food and Nutrition provides a comprehensive overview of food components and the biochemistry of foods and digestion It outlines nutrition needs at different life stages dietary disorders and social and cultural influences on food selection and consumption It also explores the increasing influence of technology on agriculture and food preparation and recent research into intergenerational nutrition and nutrigenomics At every stage it points to how you can impact your own health and the health of others as a global citizen and as a health or other food system related professional Extensively illustrated with informative graphs diagrams and data and with examples glossaries and reflective exercises Food and Nutrition is the ideal introduction to the field of nutrition and dietetics for the 21st century and a valuable professional reference for early career dietitians

Food John Coveney, 2023-12-18 In Food John Coveney examines food as identity politics industry regulation the environment justice and gastronomy He explores how food helps us understand what it means to be human The centrality of food in life and the importance of food as life is undeniable As a source of biological substrates personal pleasure and political power food is and has been an enduring requirement of human biological social and cultural existence In recent years interest in food has increased across the academic public and popular spheres fuelled by popular media s constant play on the role of food and body size and food and cooking as a mass spectacle for TV audiences Through food we construct our social identities our families and communities However Coveney also highlights the tensions between the industrialisation of food the environment and the iniquitous distribution of food He also considers how the food industries on which most of us must rely have also had direct effects on our bodies through diet and the development of illness and diseases This accessible primer is for students and general readers alike indeed for anyone with an interest in food It questions the idea that food is merely something inert on the plate Instead it shows how influential symbolic powerful and transformative food has come to be

Transforming Food Systems Molly D. Anderson, 2024-07-04 This book focuses on the contested nature and competing narratives of food system transformations despite it being widely acknowledged that changes are essential for the safeguarding of human and planetary health and well being The book approaches food system transformation through narratives or the stories we tell ourselves and others about how things work Narratives are closely connected with theories

of change although food system actors frequently lack explicit theories of change Using political economy and systems approaches to analyze food system transformation the author focuses on how power in food systems manifests and how this affects whom can obtain healthy and culturally appropriate food on a reliable basis Among the narratives covered are agroecology food sovereignty and technological innovation The book draws on interviews and recorded speeches by a broad range of stakeholders including international policymakers philanthropists academics and researchers workers in the food and agricultural industries and activists working for NGOs and social movements In doing so it presents contrasting narratives and their implicit or explicit theories of change This approach is vitally important as decisions made by policymakers over the next few years based on competing narratives will have a major influence on who will eat what how food will be produced and who will have a voice is shaping food systems The overarching contribution of this book is to point toward the most promising pathways for achieving sustainable food systems and refute pathways that show little hope of achieving a more sustainable future This book will be of great interest to students scholars and policymakers interested in creating a sustainable food system which will ensure a food secure socially just and environmentally sustainable future
