Dr Minocha is to be applauded for his courage in tackling an issue, CAM, that the medical profession has traditionally chosen to ignore in the hope that it would simply go away. That CAM has stubbornly refused to disappear is a testament to its popularity with the general population and demands that we take it seriously, analyze why it is used and by whom, and critically assess its efficacy and risks. For providing us with an accessible, fair, and comprehensive critique of CAM in the context of modern medical practice, we all owe a debt of gratitude to Dr Minocha.
