discovery services and websites of premier organizations in both the public and private sectors. But rather than supplying a list of all available known resources as a web search engine might, The New Walford subject specialists have carefully selected and evaluated available resources to provide a definitive list of the most appropriate and useful. With an emphasis on quality and sustainability, the subject specialists have been careful to assess the differing ways that information is framed and communicated in different subject areas. As a result, the resource evaluations in each subject area are prefaced by an introductory overview of the structure of the relevant literature. This ensures that The New Walford is clear, easy to use and intuitive.

The Law of Energy Underground Donald N. Zillman, Aileen McHarg, Adrian Bradbrook, Lila Barrera-Hernandez, 2014-03-27

While energy has been extracted from the ground for two centuries, recent years have seen transformative changes to how easy it is to access underground energy resources. This book investigates the key challenges and legal consequences of recent developments in the use of the subsurface as a source of energy. It provides a comprehensive analysis of the new technologies that have made this possible, such as the extraction of unconventional oil and gas resources through horizontal drilling and hydraulic fracturing, also known as fracking. Further developments include the expanded use of geothermal energy, which has the potential to become a major renewable energy source. The subsurface

can also be utilised for long term disposal or storage of environmentally harmful by products of energy use such as carbon capture and storage CCS and disposal of spent nuclear fuel and other nuclear waste Successful development of these technologies could enhance the use of fossil and nuclear energy by reducing the harm caused by the release of greenhouse gases and harmful radiation The authors bring together a wide variety of expertise and knowledge to examine the legal implications of the development and control of these underground activities They provide an invaluable understanding of the legal frameworks applicable to the extraction of underground energy both at the international level and in a number of important national jurisdictions Importantly the book analyses the different regulatory responses to these developments across five continents and assesses in detail the environmental impact of new energy extraction technologies

Asian Development Outlook ,2011 **Foreign Aid and Emerging Powers** Iain Watson,2014-07-11 Current debates on

emerging powers as foreign aid donors often fail to examine the myriad geopolitical geoeconomic and geocultural tensions that influence policies of Official Development Assistance ODA This book advocates a regional geopolitical approach to explaining donor donor relationships and provides a multidisciplinary critical assessment of the contemporary debates on emerging powers and foreign aid bringing together economic and geopolitical approaches in the light of the 2015 completion of the Millennium Development Goals MDGs Moving away from established debates assessing the advantages and disadvantages of foreign aid this book challenges the current geopolitical assumptions of the emerging powers concerning issues such as south south solidarity shared development experience and multipolarity It analyses how donor governments sell aid to recipients through enabling different cultural assumptions and soft power narratives of national identity and provides empirical evidence on agendas such as aid effectiveness aid for trade public private partnerships and green growth aid The book examines the role of and relationships between the leading traditional and emerging power Asian donors specifically and explores the different and contested perspectives and patterns of ODA policy through an alternative account of emerging power foreign aid to leading African and Asian recipients This book provides a valuable resource for postgraduate students and practitioners across disciplines such as development economics and geopolitics of development uniquely approaching the debate from the perspective of emerging powers and donors
