as a diagnosable disease 2 I was given an intradermal test which is a much more provocative and sensitive test than the typical scratch tests The reaction was catastrophic and my health deteriorated rapidly I was unable to perform any meaningful activity and my life was over 3 I had so many different symptoms during those ten months that I was sent to numerous different doctors who were unable to figure out what was wrong with me In the end the answers were simple 4 I was sick for 10 months and when I was finally able to get help it was from a chain of events that nearly killed me My brother gave me a book that proved instrumental in saving my life Norman Cousins s bestseller Anatomy of an Illness
