Mechanics of Moving Materials Nikolay Banichuk, Juha Jeronen, Pekka Neittaanmäki, Tytti Saksa, Tero Tuovinen, 2013-11-08 This book deals with theoretical aspects of modelling the mechanical behaviour of manufacturing processing transportation or other systems in which the processed or supporting material is travelling through the system Examples of such applications include paper making transmission cables band saws printing presses manufacturing of plastic films and sheets and extrusion of aluminium foil textiles and other materials The work focuses on out of plane dynamics and stability analysis for isotropic and orthotropic travelling elastic and viscoelastic materials with and without fluid structure interaction using analytical and semi analytical approaches Also topics such as fracturing and fatigue are discussed in the context of moving materials The last part of the book deals with optimization problems involving physical constraints arising from the stability and fatigue analyses including uncertainties in the parameters The book is intended for researchers and specialists in the field providing a view of the mechanics of axially moving materials It can also be used as a textbook for advanced courses on this specific topic Considering topics related to manufacturing and processing the book can also be applied in industrial mathematics

Liquid Sloshing Dynamics Raouf A. Ibrahim, 2005-09 This book deals with almost every aspect of liquid sloshing dynamics

The Kuroshio Power Plant Falin Chen, 2013-08-04 By outlining a new design for the Kuroshio power plant new approaches to turbine design anchorage system planning deep sea marine engineering and power plant operations and maintenance are explored and suggested The impact on the local environment particularly in the face of natural disasters is also considered to provide a well rounded introduction to plan and build a 30MW pilot power plant Following a literature review the six chapters of this book propose a conceptual design by focusing on the plant's core technologies and establish the separate analysis logics for turbine design and the relay platforms This is tempered against the ecological impact of both the construction and operation of the plant These proposed technologies and plans can be further applied to power generation in other waters such as the Gulf Stream the East
