**Higher Education and Civic Engagement: International Perspectives** Mr Iain Mac Labhrainn, Ms Lorraine McIlrath, 2012-11-28 This volume provides an original and powerful contribution to debates about the civic purpose of higher education. It suggests that universities can best realize their civic mission by making it central to their policy and practice. Bringing together researchers from three continents, the book offers an international perspective based primarily upon first hand pedagogical experience. A transatlantic overview of the purpose, place and practice of one such pedagogy service learning is provided and its potential as a foundation for civic engagement assessed. In its last section, the book moves from the theory of citizenship to practical considerations. In doing so, the book offers advice on establishing civic engagement to all those involved in teaching and learning within higher education. *The Chinese Idea of a University* Rui Yang, 2022-09-02 In *The Chinese Idea of a University* Phoenix Reborn, Rui Yang conceptualizes the cultural foundations of modern university development in Chinese societies. Instead of focusing on the uniqueness of the societies, this book aims to prove that one educational purpose could be fulfilled via many paths and that most of the characteristics the university could be found in other institutions of higher learning. Citing the practices of four selected Chinese societies, Yang opposes the existence of an impassable chasm between Chinese and Western ideas of a university and argues that it is possible to combine Chinese and Western ideas of a university. Also, this book is one of the first in English to theorize the Chinese idea of a university. It links the historical events to the present in a context of an enormous impact of Western academic models and institutions from the beginning of modern universities in Chinese societies to the contemporary period. The scholarship is of high quality, based on a thorough critical reading of relevant literature in both English and Chinese, as well as detailed empirical research carried out on the campuses of eight leading universities in the four Chinese societies under consideration. Ruth Hayhoe, professor, University of Toronto. Yang Rui has produced an academic masterwork. China has arrived as a global power, and the East Asian university has achieved or largely achieved the long project of catch up to the West. The future begins now, and the question of the Chinese idea of a university should trigger much discussion. Professor Yang favors the development of hybrid East-West higher education in the Chinese civilizational zone, noting that to an extent, existing universities have taken this path already. He develops these challenging issues with a depth of scholarship far exceeding the current journal papers in the topic area and a style of exposition that reads really well. A book of lasting importance. Highly recommended. Simon Marginson, professor, University of Oxford, joint editor in chief, *Higher Education*. [Circulars of Information of the Bureau of Education](#), United States. Office of Education, 1893. [The Student Access Guide to the Best Colleges](#) Tom Melzer, Tom Meltzer, Zach Knowler, John Katzman, 1992. Finally, a guide that goes beyond providing just facts and figures. The Princeton Review offers a guide that includes the results of the largest national student survey about colleges ever conducted.
