Healthy diet metrics: a suitability assessment of indicators for global and national monitoring purposes Edward FRONGILLO, Jennifer COATES, Eric O VERGER, Mathilde SAVY, Yves MARTIN-PRÉVEL, Lynnette NEUFELD, Bridget HOLMES, Chika HAYASHI, Chris VOGLIANO, Kuntal SAHA, Elaine BORGHI, Francesco BRANCA, 2023-07-20 This report scientifically assesses the validity usefulness and fitness for purpose of existing healthy diet metrics for population assessment for global and national monitoring. Existing healthy diet metrics were identified and critically assessed through a set of criteria for their use as global and national monitoring indicators. After comparative evaluation three healthy diet metrics were identified as the most suitable for global and national monitoring. The report highlights strengths and weaknesses for the existing healthy diet indicators. Some may be suitable for simple data collection tools and short data collection time while other indicators may require complex quantitative dietary information lengthy data collection time and might need to confirm the validity in various contexts. Some of them may only capture a limited number of the sub constructs of the construct of healthy diets. The report underlines main knowledge gap regarding the population groups for which the metrics could be used whether these indicators were developed for a particular demographic and or socioeconomic groups and their ability to be used for other population groups. The report also identifies key priority areas to further explore how these indicators could be used for more population groups and settings

Comprehensive School Physical Activity

Programs Russell Carson, Collin A. Webster, 2019-03-12 Schools are the ideal place to promote and apply the recommended accumulation of 60 minutes of daily physical activity. But until now it has been difficult to bridge the gap between research in this area and day to day practice in order to establish solid programs. That's where Comprehensive School Physical Activity Programs Putting Research Into Evidence Based Practice comes in. CSPAP Model Brought to Life The comprehensive school physical activity program CSPAP model originally outlined as a 2008 position statement by the National Association for Sport and Physical Education to promote physical activity throughout K-12 is brought to life through this comprehensive all in one resource. In the decade since that position statement CSPAP has been spreading through numerous initiatives which have mobilized a CSPAP field of study and a national framework for physical activity and physical education. CSPAP acts as a hub supporting physical activity through multiple components that can include physical education, physical activity before, during, and after school, staff involvement and family and community engagement. Moreover each CSPAP component can serve to strengthen and reinforce the academic goals of physical education. Accommodates Needs of Diverse Audiences. Comprehensive School Physical Activity Programs published in association with SHAPE America accommodates the growing needs of academic researchers, school practitioners, district coordinators, educators, advocates, organizations, university faculty, and students who want to learn more about CSPAP or undertake ways to increase daily physical activity opportunities in and around schools.
