Symeonidis, 2023-11-14 The world is moving away from demand driven electricity markets supplied by centralized generation and distribution of fossil fuel produced electricity Increasing reliance on weather dependent renewable sources will require a shift toward a supply driven paradigm while beneficial electrification including widespread

adoption of electric vehicles heat pumps and batteries will offer considerable but widely distributed demand flexibility that can be used to compensate for supply variability The open source Power Trading Agent Competition Power TAC platform simulates a decentralized future modeling the high complexity of future retail electricity markets This book describes a variety of approaches to profitable trading in realistic wholesale and retail electricity markets It presents actionable insights from extensive exploration of policies and business models for retail electricity markets gained from a decade of Power TAC tournaments and from research inspired by the Power TAC experience Featuring contributions from tournament designers competitors and scientists combining best practices from computer science and economics and management science this book is of benefit to academics researchers practitioners and policy makers in sustainable energy and wholesale and retail electricity markets     *Electric Charging Intended Functionality, Availability, and Equity Inclusion* Brian J.

Kozumplik,2023-01-19 As unprecedented growth in EV sales is expected and the number of public charging stations must be planned accordingly as charger up time and functionality i e availability is the number one factor for users once the charging system is installed Electric Vehicle Intended Functionality Availability and Equity Inclusion informs current customers and potential purchasers of functionality availability and equity inclusion issues with EV charging systems currently in production and in use across North America and Europe Note that if shortages of available chargers are recognized and exposed across the US this could then have a negative impact on future potential EV customers from making the leap from traditional ICE vehicles to EVs Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2023001>
