In recent years Web applications that combine highly dynamic data streams with data distributed over the Web to provide relevant answers have attracted increasing attention. Answering in a timely fashion i.e. reactively is one of the most important performance indicators especially when the distributed data is evolving. Tom Conte,Nacho Navarro,Wen-mei W. Hwu,Mateo Valero,Theo Ungerer,2005-11-04 As Chairmen of HiPEAC 2005 we have the pleasure of welcoming you to the proceedings of the first international conference promoted by the HiPEAC Network of Excellence During the last year HiPEAC has been building its clusters of researchers in computer architecture and advanced compiler techniques for embedded and high performance computers Recently the Summer School has been the seed for a fruitful collaboration of renowned international faculty and young researchers from 23 countries with fresh new ideas Now the conference promises to be among the premier forums for discussion and debate on these research topics

The prestige of a symposium is mainly determined by the quality of its technical program This first program lived up to our high expectations thanks to the large number of strong submissions The Program Committee received a total of 84 submissions only 17 were selected for presentation as full length papers and another one as an invited paper Each paper was rigorously reviewed by three Program Committee members and at least one external referee Many reviewers spent a great amount of effort to provide detailed feedback In many cases such feedback along with constructive shepherding resulted in dramatic improvement in the quality of accepted papers The names of the Program Committee members and the referees are listed in the proceedings The net result of this teamwork is that the symposium proceedings include outstanding contributions by authors from nine countries in three continents In addition to paper presentations this first HiPEAC conference featured two keynotes delivered by prominent researchers from industry and academia
