Applied Engineering Mathematics Apul Dev,Sayantan Guha,2025-09-04 The publication of this book is motivated by the need to present the latest research advancements in the fields of Fluid Solid Mechanics Nonlinear Dynamics and Differential Equations in Applied Mathematics. This book gathers the work of leading experts offering cutting edge findings addressing existing challenges in the field. It covers a broad spectrum of topics including advanced computational methods mathematical modeling different Mathematical methods their applications in many scientific disciplines like predicting the nature and behavior of physical systems in engineering. These problems often require solving differential equations governing fluid flow heat transfer and structural deformation often simultaneously among other topics. Each chapter delves into specific problems showcasing interdisciplinary approaches demonstrating the practical impact of mathematical research on real world issues. This book is a great resource for scholars professionals and researchers as it offers a comprehensive overview of cutting edge methodologies innovative solutions. It aims to stimulate additional investigation promote interdisciplinary collaboration make substantial contributions to advancing knowledge.

Basal ganglia: physiological, behavioral, and computational studies Ahmed A. Moustafa,Alon Korngreen,Izhar Bar-Gad,Hagai Bergman,2015-05-26 The basal ganglia has received much attention over the last two

decades as it has been implicated in many neurological and psychiatric disorders. Most of this research in both animals and humans attempt to understand the neural and biochemical substrates of basic motor and learning processes and how these are affected in human patients as well as animal models of brain disorders. The current volume contains research articles and reviews describing basic pre clinical and clinical neuroscience research of the basal ganglia written by attendees of the 11th Triennial Meeting of the International Basal Ganglia Society IBAGS that was held March 3-7th 2013 at the Princess Hotel Eilat Israel and by researchers of the basal ganglia. Specifically articles in this volume include research reports on the biochemistry, computational theory, anatomy and physiology of single neurons and functional circuitry of the basal ganglia networks as well as the latest data on animal models of basal ganglia dysfunction and clinical studies in human patients.

Physics Briefs, 1990 Response of Structures Under Extreme Loading Venkatesh K.R. Kodur, Nemkumar Banthia, 2015-07-01. Original research on performance of materials under a wide variety of blasts, impacts, severe loading and fire. Critical information for protecting buildings and civil infrastructure against human attack, deterioration and natural disasters. Test and design data for new types of concrete, steel and FRP materials. This technical book is devoted to the empirical and theoretical analysis of how structures and the materials constituting them perform under the extreme conditions of explosions, fire and impact. Each of the 119 fully refereed presentations is published here for the first time and was selected because of its original contribution to the science and engineering of how materials, bridges, buildings, tunnels and their components such as beams and pre-stressed parts respond to potentially destructive forces. Emphasis is placed on translating empirical data to design recommendations for strengthening structures including strategies for fire and earthquake protection as well as blast mitigation. Technical details are provided on the development and behavior of new resistant materials including reinforcements especially for concrete, steel and their composites.
