

Study Guide for Unit 1 (Math 5)

Key Concepts:

1. Place Value and Powers of Ten

- Understand how multiplying by powers of 10 shifts the digits to the left.
- Example: 10 times as much as 900 is 9,000 (because $900 \times 10 = 9,000$).

2. Reading Large Numbers

- Be able to identify digits in different place values, such as the hundred thousands place.
- Example: In 7,  32,465, the digit in the hundred thousands place is 9.

3. Multiplication and Division for Problem Solving

- Be able to apply multiplication and division to solve real-world problems.
- Example: Calculating hours of sleep in a year based on weekly hours of sleep, or how many 50-pound bags of soil you can fill from a cubic yard.

4. Word Problems and Rate Problems

- Use division to find how long it takes to complete a task based on a constant rate.
- Example: How long will it take to drain a pond of 2,106 gallons at a rate of 78 gallons per hour?

5. Estimation and Rounding

- Estimating reasonable values for large numbers based on multiplication or division.
- Example: Estimating how many bags of topsoil you can fill with a cubic yard of soil.

6. Basic Operations with Fractions and Decimals

- Understanding fractions and decimals in the context of real-world problems.

5th Grade MCAS Test Prep Mark Shannon,2018-01-24 This test prep is
good for kids who are on the fence and having trouble passing or need to increase their margin These kids will often say I
DON T KNOW WHERE TO START when explaining their confusion This book address that problem with three approaches 1
In contrast with the other study guides that use random questions in their practice exams this book collated the questions
into chapters based on the logic to solve them The 5th grade book is divided into eight chapters They are Logic Arithmetic
Geometry Fractions Reading Graphs and tables Measurements including a ruler basic statistics and order of operations This
book teaches basics then goes into practice exams with word problems Once the student is proficient with the questions
organized into chapters then they are ready for random questions 2 This study guide has thousands of practice problems I
have placed over 3100 videos on YouTube showing you how to work the problems3 I reviewed several years of past exams
and placed enfaces on the easiest and most common questions Mastering these questions should yield a 75% to 80% If a
student is already achieving this percentage the other guides or web site with random questions and covering all material
might be best A book might be better for your student than the web sites for two reasons 1 The more common and easiest
questions are using a ruler to measure The web designers don t know the size of your computer screen and can t determine if
the student has measured correctly We can get a high percentage of these problems easily 2 When studying on a computer
there are too many websites with the answers With a book parents can have greater assurance the work is being done This
book is developed by a trained professional out of concern It is not the product of a large publishing house It is the results of
one person who wants to help Best RegardsMark Shannon
