Mechanisms, Linkages, and Mechanical Controls Nicholas P. Chironis, 1965 [Solving Geometric Constraint Systems](#) Glenn A. Kramer, 1992 Solving Geometric Constraints records and explains the formal basis for graphical analysis techniques that have been used for decades in engineering disciplines. It describes a novel computer implementation of a 3D graphical analysis method degrees of freedom analysis for solving geometric constraint problems of the type encountered in the kinematic analysis of mechanical linkages providing the best computational bounds yet achieved for this class of problems. The technique allows for the design of algorithms that provide significant speed increases and will foster the development of interactive software tools for the simulation optimization and design of complex mechanical devices as well as provide leverage in other geometric domains [Fault Analysis and Protection System Design for DC Grids](#) Abhisek Ukil, Yew Ming Yeap, Kuntal Satpathi, 2020-04-13 This book offers a comprehensive reference guide to the important topics of fault analysis and protection system design for DC grids at various voltage levels and for a range of applications. It bridges a much needed research gap to enable wide scale implementation of energy efficient DC grids. Following an introduction DC grid architecture is presented covering the devices operation and control methods. In turn analytical methods for DC fault analysis are presented for different types of faults followed by separate chapters on various DC fault identification methods using time frequency and time frequency domain analyses of the DC current and voltage signals. The unit and non unit protection strategies are discussed in detail while a dedicated chapter addresses DC fault isolation devices. Step by step guidelines are provided for building hardware based experimental test setups as well as methods for validating the various algorithms. The book also features several application driven case studies [Advanced High Strength Steel And Press Hardening - Proceedings Of The 2nd International Conference \(Ichs2015\)](#) Yisheng Zhang, Mingtu Ma, 2016-03-11 This proceedings brings together one hundred and ten selected papers presented at the 2nd International Conference on Advanced High Strength Steel and Press Hardening ICHSU2015 which was held in Changsha China during October 15-18 2015. To satisfy the increasingly urgent requirement of reducing the weight of vehicle structures and increasing passenger safety ICHSU2015 provided an excellent international platform for researchers to share their knowledge and results in theory methodology and applications of advanced high strength steel and press hardening technology. This conference aroused great interests and attentions from domestic and foreign researchers in hot stamping field. Experts in this field from Australia, China, Germany and Sweden contributed to the collection of research results and developments. The papers cover almost all the current topics of advanced high strength steel and press hardening technology [Springer Handbook of Augmented Reality](#) Andrew Yeh Ching Nee, Soh Khim Ong, 2023-01-01 The Springer Handbook of Augmented Reality presents a comprehensive and authoritative guide to augmented reality AR technology its numerous applications and its intersection with emerging technologies.
