Media Feiten Structuren:

Biotechnology in the Public Sphere Martin W. Bauer, John Durant, George Gaskell, 1998 A comprehensive assessment of European public opinion and biotechnology. It brings together comparative research on policy making, media coverage and public perceptions. This book is the major output from a three year research initiative undertaken by an international multidisciplinary team of social scientists. Following an introductory conceptualisation of biotechnology in the public sphere, Part Two brings together information on the policy activity, media coverage and public perceptions of biotechnology in European countries. Part Three is a detailed analysis of a major European survey of public perceptions. Part Four brings together the three elements of the research and provides a synthetic overview of the development of public perceptions of biotechnology in Europe.

Hollywood op straat Thomas Elsaesser, 2000 An introduction to film and TV studies highlighting different aspects of today's media landscape in Dutch. *Western Broadcast Models* Leen Haenens, Frieda Saeys, 2007 CD ROM includes data about general developments in broadcasting, specific examples and analysis techniques.

Western Broadcasting at the Dawn of the 21st Century Leen d' Haenens, Frieda Saeys, 2021-06-21 Broadcasting is an important indicator of a society's political, economical, social, cultural and geographical context. While currently at a crossroads, European broadcasting remains highly diverse due to the fragmentation of national policies. The book introduces the reader to the topic by providing and explaining facts, figures and techniques of analysis. The contributions to the first section of Western Broadcasting examine the general theoretical framework. The articles in the second section map out European media cases. The book's twofold approach is reflected in the accompanying CD ROM which also contains examples and hyperlinks.

Media Dynamics & Regulatory Concerns in the Digital Age Leen D'Haenens, Frieda Saeys, 1998

Media & Open Societies, 2000 Traditional national and medium specific regulatory models in communications policy in the East and West have become outdated. New, medium neutral and internationally oriented regulatory models are replacing them. This book discusses how these new regulatory models can contribute to the emergence of an open society that is a society in which all have access to society's information and communication resources in a non discriminatory and affordable way. Experts from the Faculty of Journalism of Moscow State University, The Amsterdam School of Communications Research, ASCoR of the University of Amsterdam and other experts from Finland, the United Kingdom and Belgium address this question. The papers in this volume discuss key issues in the development of communications policies for open societies. These issues focus on the social responsibilities of media in a changing society, the role of competition in stimulating media innovation and diversity and the potential of new media in strengthening user's autonomy and empowerment. Expressing different historical contexts, the editors approach the issues from very different perspectives but with the common objective of understanding the converging media dynamics in East and West. The resulting mix contributes to the debate surrounding the communications policies that will stimulate the development of global openness in the 21st century.
