Notifier Programming Manual:

Power Programming with RPC John Bloomer, 1992-02 Computer Systems Organization Computer Communication Networks

XView Reference Manual Thomas Van Raalte, 1991 XView was developed by Sun Microsystems and is derived from Sun's proprietary programming toolkit SunView. It is an easy to use object oriented toolkit that provides an OPEN LOOK user interface for X applications. For XView Version 3 the major additions are Internationalization support for XView programs. A new Drag and Drop package that lets the user transfer data between applications by dragging an interface object to a region. A mouseless input model that means XView applications can be controlled from the keyboard without a mouse. Soft function keys are also supported. The Notices package has been completely rewritten to incorporate Notice objects. The Selection package has been rewritten replacing the SunView style selection service. New panel items such as multiline text items and drop target items have been included. The Panels chapter has been reworked to clarify and simplify panel usage. XView Version 3.2 includes minor bug fixes with no significant new functionality. The XView Reference Manual has been expanded from the Attribute Summary of the previous edition of the XView Programming Manual and is now published as a companion volume. The XView toolkit provides extensive attribute value pair combinations, convenience routines, and object class hierarchies that are too voluminous to memorize without the aid of this comprehensive reference guide. It contains alphabetical listings of XView attributes, functions, and macros, as well as other reference information essential for XView programmers. A must have companion for the XView Programming Manual.

XView Programming Manual Dan Heller, 1990 Xview on the X window system. The X view programmer's model. Creating Xview applications. Frames. Canvases and openwin. Handling input. Panels. Text subwindows. TTY subwindows. Scrollbars. Menus. Notices. Cursors. Icons. Nonvisual objects. Fonts. Resources. The selection service. The notifier. Color. Error recovery and help. Xview internals. Appendixes. Figures. Examples. Tables.

SunNet Manager 2.2 Programmer's Guide, 1995 SunSoft Inc. headquartered in Mountain View, Calif. is a subsidiary of Sun Microsystems Inc. SunSoft's charter is to design, market, sell, and support the industry's highest quality software environment for enterprise rightsizing and network computing applications. The company, which is the industry's highest volume UNIX vendor, has offices in North America, Europe, and Asia and is a leading supplier of 32-bit system software solutions for SPARC, Intel 386, 486, and Pentium based computers. The products are licensed by SunSoft and distributed through major computer manufacturers and resellers worldwide. SunNet Manager (SNM) is a distributed management system that provides a comprehensive software environment for integrated network management solutions. It is based on a protocol independent distributed management architecture that supports open industry standards such as SNMP including version 2, TCP/IP, and ONC/RPC. Using these standard management protocols, SNM is a powerful end-user tool as both a management platform and a development environment. Its integrated tools provide fault, configuration, accounting, performance, and security management services. Third-party applications complement these SNM tools. The

integrated flexible development environment enables vendors and users to build custom tools to address unique requirements With over 20 000 installations SunNet Manager continues to set the standard in the network management arena for intuitive easy to use applications and open protocol independent interfaces When accounting for the respective market shares of strategic OEMs and partners SNM represents more than 57% of the network management market share The SunNet Manager Solutions Program consists of more than 150 software vendors Human-computer Interaction Alan Dix,1998 Extensively revised and rewritten in light of recent advances this best selling text is a comprehensive examination of human computer interaction The central focus of this exciting revision is the design of computer technology and how computer technology can be made more usable by people It provides a multi disciplinary approach to the subject through a synthesis of computer science cognitive science psychology and sociology and stresses a principled approach to interactive systems design that fits a software engineering environment **Department of Housing and Urban**
