Nsfas Forms For 2015:

Fees Must Fall Susan Booysen, 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt. FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa. More broadly it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical top down leadership system of university management and its double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance. University managements while on one level amenable to change have also co-opted students into their ranks to create co-responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance and offer provocative analyses of the power of the revolt.

The Rise of the Radical Right in the Global South Rosana Pinheiro-Machado, Tatiana Vargas-Maia, 2023-05-31 The Rise of the Radical Right in the Global South is the first academic study adopting an interdisciplinary and international perspective to offer a comprehensive and groundbreaking framework for understanding the emergence and consolidation of different radical right movements in Global South countries in the twenty first century. From deforestation and the anti vaccine movement in Bolsonaro's Brazil to the massacre of religious minorities in Modi's India, the rise of the radical right in the Global South is in the news every day. Not long ago some of these countries were globally celebrated as emerging economies that consolidated vibrant democracies. Nonetheless they never overcame structural problems including economic inequality, social violence, cultural conservatism and political authoritarianism. Featuring case studies from Brazil, India, the Philippines and South Africa and more generally from Africa and Latin America, this book analyses future scenarios and current alternatives to this political movement, the radical right. It proposes a shift of focus in examining such a trend, adopting a view from the Global South, conventional theoretical tools developed around the experience in Global North countries are not enough. The authors show that the radical right in the Global South should be analysed through specific lenses considering national historical patterns of political and economic development and instability. They also warn that researching these countries may differ from contexts where democratic institutions are more reliable. This does not mean abandoning a transnational understanding of the radical right; rather it calls for the opposite: the chapters examine how the radical right is invented, adapted, modified and resisted in

specific regions of the globe This volume will be of interest to all those researching the radical right and the politics of development and the Global South

Research Reza Hosseini, National Youth Development Agency Annual Report South Africa. National Youth Development Agency, 2016 Governance and the postcolony David Everatt, 2019-08-01 Civil society NGOs governments and multilateral institutions all repeatedly call for improved or good governance yet they seem to speak past one another Governance is in danger of losing all meaning precisely because it means many things to different people in varied locations This is especially true in sub Saharan Africa Here the postcolony takes many forms reflecting the imperial project with painful accuracy Offering a set of multidisciplinary analyses of governance in different sectors crisis management water food security universities in different locales across sub Saharan Africa and from different theoretical approaches network to adversarial network governance this volume makes a useful addition to the growing debates on how to govern It steers away from offering a correct definition of governance or from promoting a particular position on postcoloniality It gives no neat conclusion but invites readers to draw their own conclusions based on these differing approaches to and analyses of governance in the postcolony As a robust critical assessment of power and accountability in the sub Saharan context *Governance and the Postcolony Views from Africa* brings together topical case studies that will be a valuable resource for those working in the field of African international relations public policy public management and administration
