Greenfield,Rodney R. Cocking,2014-02-25 This book constitutes the first time in the field of developmental psychology that cross cultural roots of minority child development have been studied in their ancestral societies in a systematic way and by an international group of researchers Most child development and child psychology texts

take cultural diversity in development into account only as an addendum or as a special case it is not integrated into a comprehensive theory or model of development The purpose of this text is to redress this situation by enlisting insiders and outsiders perspectives on socialization and development in a diverse sampling of the world s cultures including developing regions that often lack the means to speak for themselves in the arena of international social science The unique feature of this text is the paradigm For the minority groups represented the questions focused on how development was behaviorally expressed within the culture of origin and in new societal contexts Thus developmental issues such as language and mother child interactions for African American children are considered in the United States as well as in the African culture of origin and in France as a country of immigration This paradigm is considered for African and Asian cultures and the Americas including Hispanics from Mexico as well as Native Americans Specific questions posed consider the extent to which the development and socialization of minority children can be seen as continuous with their ancestral cultures the cultural and political conditions in the United States Canada and France have modified developmental and socialization processes yielding discontinuities with ancestral cultures the ancestral cultures have changed yielding cross generational discontinuities in the development and socialization of immigrants from the very same countries the role of interdependence and independence in developmental scripts can account for historical continuities and discontinuities in development and socialization both across and within cultures These questions not only provide the unifying theme of this unique book but also a model for conceptualizing multi culturalism within a unified framework for developmental psychology

comparative perspective The anthropologists who have contributed to this collection are field workers who have lived intimately over significant periods of time with the people about whom they are writing These research reports from the field have been edited to make them wholly accessible to the non specialist The contributors of this volume recognize that biology and ideology are intertwined both together influence the father s behavior and the effects of his behavior

**Words on Cassette** ,1999 **The Markham Languages of Papua New Guinea** Susanne Holzknecht,1989 The main aims of this work are to establish the status of the Austronesian languages of the Markham Valley and its hinterland and of the upper Ramu Valley in Papua New Guinea in relation to other languages of the Oceanic group and to delineate their sub groupings Descriptions of the phonologies and morphosyntactic systems are provided as the basis for the comparative analysis A reconstruction of the history of these languages is attempted using the available linguistic historical social and geographical information The comparative method is used to investigate the relationships between these languages The material for the study consists of phonological morphosyntactic and lexico semantic data collected by the writer in the field Sociolinguistic cultural and oral historical information was also collected and used as supplementary evidence Chapter 1 introduces the topics for investigation and outlines the conventions used in the thesis In Chapter 2 are presented some theoretical considerations a review of previous work on Markham languages and an outline of the methodology used for data collection and analysis

Chapter 3 presents the Markham language communities in their geographical and social context. The social background of the societies is given in some detail because the languages and their history cannot be considered apart from this social context. The main linguistic data upon which this work is based is presented in Chapter 4 Phonology and Chapter 5 Morphosyntax. In Chapter 4 are brief phonological sketches of each of the Markham languages. After a discussion of previous reconstructions of Proto Oceanic and Proto Huon Gulf a reconstruction of the phonology of Proto Markham is outlined and supporting evidence for the reconstructions is given. Chapter 5 consists of analyses, comparisons and reconstructions of aspects of the Markham languages morphosyntax. In Chapter 6 the comparisons and contrasts presented in the previous two chapters are drawn together and the evidence for the internal unity and genetic relationship of the Markham languages is given in detail. Hypotheses about the sub grouping of the languages are outlined and evidence supporting these hypotheses is presented. Chapter 7 concludes the study with a summary of the findings. The evidence supports the proposition that the Markham languages form an internally consistent genetically related unit which is descended from Proto Oceanic through Proto Huon Gulf. It consists of three groups Upper Markham, Watut and Lower Markham of which the Upper Markham and Lower Markham groups are further divided into several sub groupings. The history of the Markham languages is outlined and evidence supporting this scenario is provided from linguistics, from oral histories, cultural data and geographical sources.
