

QUESTION 10

For which of the following reasons should a company that produces an elastic output avoid using the process cost method, and why?

The process cost method is not very accurate because it averages costs across all units produced.

The process cost method does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.

The process cost method does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.

The process cost method does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.

ANSWER 10

- A. It is not very accurate because it averages costs across all units produced.
- B. It does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.
- C. It does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.
- D. It does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.

Correct answer is B. The process cost method does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.

QUESTION 11

For which of the following reasons should a company that produces an elastic output avoid using the process cost method, and why?

The process cost method is not very accurate because it averages costs across all units produced.

The process cost method does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.

The process cost method does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.

The process cost method does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.

- A. It is not very accurate because it averages costs across all units produced.
- B. It does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.
- C. It does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.
- D. It does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.

Correct answer is B. The process cost method does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.

- A. It is not very accurate because it averages costs across all units produced.
- B. It does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.
- C. It does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.
- D. It does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.

The process cost method does not allow for the identification of specific units of production, which makes it difficult to identify quality control problems.
