Models for Ecological Data James S. Clark,2020-10-06

The environmental sciences are undergoing a revolution in the use of models and data Facing ecological data sets of unprecedented size and complexity environmental scientists are struggling to understand and exploit powerful new statistical tools for making sense of ecological processes In Models for Ecological Data James Clark introduces ecologists to these modern methods in modeling and computation Assuming only basic courses in calculus and statistics the text introduces readers to basic maximum likelihood and then works up to more advanced topics in Bayesian modeling and computation Clark covers both classical statistical approaches and powerful new computational tools and describes how complexity can motivate a shift from

classical to Bayesian methods Through an available lab manual the book introduces readers to the practical work of data modeling and computation in the language R Based on a successful course at Duke University and National Science Foundation funded institutes on hierarchical modeling Models for Ecological Data will enable ecologists and other environmental scientists to develop useful models that make sense of ecological data Consistent treatment from classical to modern Bayes Underlying distribution theory to algorithm development Many examples and applications Does not assume statistical background Extensive supporting appendixes Lab manual in R is available separately **A Directory of Computer Software Applications** ,1979 **American Journal of Physics** ,1989 Laboratory Animal Science ,1999 **Control Engineering** ,1960 Instrumentation and automatic control systems Laboratory Manual in General Microbiology Michigan State University.
