

Neonatal Resuscitation Program, 8th edition- Algorithm

The most important and effective action in neonatal resuscitation is ventilation of the baby's lungs.

Ventilation Corrective Steps (MRLSOPA)

When a MRLSOPA step results in chest movement, ventilate for 30 seconds and reassess heart rate.

*Increase pressure incrementally by 5 to 10 cm H₂O. The maximum recommended pressure is 40 cm H₂O in term baby.

Saving mothers and babies for the new world Zaleha Abdullah Mahdy, Azanna Ahmad Kamar, Hamizah Ismail, Fook-Choe Cheah, David Alan Ellwood, Ranjan Pejave, 2023-10-25 The Right to Die with Dignity Derya Nur Kayacan, 2022-06-20 Can I choose to die? As the number of requests for euthanasia and physician-assisted suicide continues to rise, human rights law faces a new conflict: the right to die vs. the right to life. The right to die, or in other words, the right to choose the time and manner of one's own death, is a question of personal autonomy and its limits. This book provides a comprehensive understanding of the right to die and sheds light on its possible future under the European Convention on Human Rights. After setting a clear framework by defining the key terminology, the book takes a two-part approach to achieving its aim. The first part focuses on the right to die in practice by examining selected jurisdictions: Switzerland, which is famous for its assisted suicide organizations, and the Netherlands, which was the first country to legalize euthanasia, are examined in detail. Belgium, Germany, the United Kingdom, and as an exception to the Convention perspective, Canada, are also included. While this examination offers a better understanding of what the right to die looks like in practice, it also provides insights on the slippery slope argument, which serves as a counterweight to personal autonomy without making a definitive statement on its validity. This part also illustrates the different paths that led or did not lead to the right to die in practice. The second part is an analysis of the European Court of Human Rights case law on the right to die. The Court has made important statements in only very few cases, while its caution when approaching such a delicate and controversial topic among its 47 members is understandably emphasized. This analysis of the Court's approach to the balancing of personal autonomy against other interests allows us to take a look back at the practice in more permissive jurisdictions through the lens of the Convention. Taken together, the book's two parts provide

valuable lessons for countries that decide to practice assisted dying which are outlined in the conclusion In addition given that a purely legal approach can only offer a partial picture the book argues that an interdisciplinary approach would be much more favorable in terms of providing the necessary basis for the right to die debate Williams Obstetrics 26e F.
