An Economist Walks into a Brothel Allison Schrager,2019-04-02 A Financial Times Book of the Month pick for April Is it worth swimming in shark infested waters to surf a 50 foot career record wave Is it riskier to make an action movie or a horror movie Should sex workers forfeit 50 percent of their income for added security or take a chance and keep the extra money Most people wouldn t expect an economist to have an answer to these questions or to other questions of daily life such as who to date or how early to leave for the airport But those people haven t met Allison Schrager an economist and award winning journalist who has spent her career examining how people manage risk in their lives and careers Whether we realize it or not we all take risks large and small every day Even the most cautious among us cannot opt out the question is always which risks to take not whether to take them at all What most of us don t know is how to measure those risks and maximize the chances of getting what we

want out of life In *An Economist Walks into a Brothel* Schrager equips readers with five principles for dealing with risk principles used by some of the world's most interesting risk takers For instance she interviews a professional poker player about how to stay rational when the stakes are high a paparazzo in Manhattan about how to spot different kinds of risk horse breeders in Kentucky about how to diversify risk and minimize losses and a war general who led troops in Iraq about how to prepare for what we don't see coming When you start to look at risky decisions through Schrager's new framework you can increase the upside to any situation and better mitigate the downside
