consistently structured making it an ideal reference book. *Handbook of Task Analysis Procedures* is designed to help the reader select a specific task analysis technique for a particular situation. Having done this the reader can then refer to the appropriate chapter for his chosen technique. This chapter provides a statement of purpose an overview and applications. It then presents a step by step description of how to use the procedure. The chapter concludes with examples an evaluation and a complete set of references. Designed to be used in education and by trainers in the business sector this volume is a unique reference book. Part I provides an overview of Task Analysis and describes the variables that affect how task analysis is performed. A decision table and discussion help the reader select specific techniques. The techniques are grouped in Part II III and IV according to their functional similarity learning analysis job analysis content analysis. Part V describes information gathering tools. This Handbook is essential for the reader who believes that competent task analysis is a vital part of instructional design.
