Kinkead,2010 Editors Laurie Grobman and Joyce Kinkead offer a groundbreaking collection of essays that aims to mobilize the profession of English studies to further participate in undergraduate research which in the past had been reserved for scientific fields Why shouldn t undergraduates in English studies have the same opportunities as those in the sciences to benefit from undertaking real research that can inform and have an impact on practitioners in the discipline They should and can according to editors Laurie Grobman and Joyce Kinkead who have produced this collection to showcase the first steps being made to integrate undergraduate research into English studies and even more important to point the way toward greater involvement Undergraduate Research in English Studies is a groundbreaking collection that aims to mobilize the profession of English studies to further participate in undergraduate research an educational movement and comprehensive curricular innovation that is the pedagogy for the twenty first century according to the Joint Statement of Principles composed by the Council on Undergraduate Research and the National Conferences on Undergraduate Research Students engaged in genuine research gain an insider s understanding of field specific debates develop relevant skills and insights for future careers and graduate study and contribute their voices to creating knowledge through the research process Some contributors discuss the importance of mentoring how to conduct research responsibly and avenues for disseminating research and scholarship locally regionally nationally or internationally Others provide case studies of undergraduate research in literature and in

composition and rhetoric The volume combines theory and practice and lays the groundwork for further practice and inquiry sending forth a call to broaden undergraduate research possibilities in all areas of English Scientific Integrity Francis L. Macrina, 2005 *Scientific Integrity Text and Cases in Responsible Conduct of Research* 3rd Edition presents an important revision of a best selling text in the expanding field of responsible conduct of research training Presents the core topics for graduate and postdoctoral trainees and professional researchers on the principles of scientific integrity Contains highly relevant interactive case studies 30% of which are new to third edition written by practicing scientists on the front lines of ethical issues Covers essential topics related to the conduct of scientific investigation such as guidelines policies standards and codes Offers a companion Web site maintained by the author containing a rich collection of Internet resources Includes discussion questions to promote critical thought Provides updates to most appendix material *The Law of Higher Education: Rights and responsibilities of individual students* William A. Kaplin, Barbara A. Lee, 2006 An updated two volume guide to legal issues that affect higher education including relations with the governing board personnel students government and external private entities Over one third of the content is new covering such issues as the implications of the USA PATRIOT Act allocation of mandatory student activities fees and the rights of intercollegiate athletes **College & Research Libraries News** , 2005 Changing of Knowledge in Composition Lance Massey, Richard C. Gebhardt, 2011-07-16 Lance Massey and Richard Gebhardt offer in this collection many signs that composition again faces a moment of precariousness even as it did in the 1980s the years of the great divorce from literary studies The contours of writing in the university again are rapidly changing making the objects of scholarship in composition again unstable Composition is poised to move not from modern to postmodern but from process to postprocess from a service oriented field to a research driven discipline Some would say we are already there Momentum is building to replace composition and the pedagogical imperative long implied in that term with a writing studies model devoted to the study of composition as a fundamental tool of and force within all areas of human activity Appropriately contributors here use Stephen M North's 1987 book *The Making of Knowledge in Composition* to frame and background their discussion as they look at both the present state of the field and its potential futures As in North's volume *The Changing of Knowledge in Composition* describes a body of research and pedagogy brimming with conflicting claims methodologies and politics and with little consensus regarding the proper subjects and modes of inquiry The deep ambivalence within the field itself is evident in this collection Contributors here envision composition both as retaining its commitment to broad based generalized writing instruction and as heading toward content based vertical writing programs in departments and programs of writing studies They both challenge and affirm composition's pedagogical heritage And they sound both sanguine and pessimistic notes about composition's future
