Philosophy and Theory of Artificial Intelligence 2017 Vincent C. Müller,2018-08-28 This book reports on the results of the third edition of the premier conference in the field of philosophy of artificial intelligence PT AI 2017 held on November 4 5 2017 at the University of Leeds UK It covers advanced knowledge on key AI concepts including complexity computation creativity embodiment representation and superintelligence cutting edge ethical issues such as the AI impact on human dignity and society responsibilities and rights of machines as well as AI threats to humanity and AI safety and cutting edge developments in techniques to achieve AI including machine learning neural networks dynamical systems The book also discusses important applications of AI including big data analytics expert systems cognitive architectures and robotics It offers a timely yet very comprehensive snapshot of what is going on in the field of AI especially at the interfaces between philosophy cognitive science ethics and computing **Original Intelligence** David Premack,Ann J. Premack,2003 In Original Intelligence leading experimental psychologist David Premack and his collaborator Ann Premack present a joint effort in teasing out exactly what are the deep characteristics of the human mind as they draw upon their years of brilliant experimentation

from wise decision making especially in the age of artificial intelligence AI where algorithms are increasingly used to automate business processes or to augment the accuracy and speed of decisions This book argues why specific forms of intelligence as well as consciousness and enhanced conscience are crucial to make wise decisions with consciousness to be clearly distinguished from intelligence It also addresses why machine learning and smart computers AI are plausibly able to make smart and thus to a certain extent intelligent decisions but definitely unable to help us to become wiser In essence optimizing a desired output in a business context will require a balanced approach with cognitive awareness and ethical reflection synthesizing intuitive and algorithmic thinking encompassing short term profit and longer term envisioning and aiming to optimize created and captured value for shareholders while taking the concerns of those who have a real stake in the organization seriously If business is about creating and sharing value in a future that is both digital and relational then innovative technologies like AI will play an increasingly important role Consequently mindful executives and their responsible boards therefore need to acknowledge the limitations of AI in business especially when the uncertain future is estimated to be rather volatile or ambiguous than stable *The Inland Architect and News Record* ,1900 **The Architect** ,1874
