[Palliative Care -- Perspectives, Practices and Impact on Quality of Life](#) Michael Silbermann, 2017 This book provides a new outlook on the practice of palliative care

worldwide All five continents are represented in this book by global leaders in this relatively new subspecialty The chapters in the book re emphasize the fact that in the 21st century most patients in the world still lack this elementary tool to alleviate suffering physical and even more so emotional and spiritual which are so critical to people especially when patients conditions become fatal An issue that comes up again and again from almost all parts of the world regardless of religion and traditional backgrounds ethnicities beliefs or faith refers to the critical lack of basic and advanced training for physicians nurses volunteers and the public at large Healthcare professionals are currently not equipped with the principles of communication with both the patient and his her relatives These kinds of drawbacks have to be corrected immediately Moreover training courses symposia and conferences do not require large amounts of funds and can be carried out in local countries and or regions which share a common language culture and faith Each country needs to create a nucleus of local champions who would then take it upon themselves to educate as many people in their own countries with the support guidance and encouragement of international organizations that are dedicated to this mission Almost all of the larger international institutions e g the UN and WHO preach for improvement of the current situation Unfortunately responses are extremely slow and not efficient This book calls for the global health community to urgently respond and bring about a rapid change in a totally unjustified situation that still prevails in over three quarters of the world

clinicians and patients *After the ICU: Multidisciplinary Perspectives on Supporting Critical Illness Survivors* Meghan Lane-Fall, David S. Shapiro, Lewis Kaplan, 2023-10-13 An essential guide to navigating the journey to recovery from critical illness Millions of patients are admitted to intensive care units ICUs each year one third of whom need a ventilator machine to help them breathe These critically ill patients may develop health problems related to their illness injury ventilator or other treatments Such problems can continue after the patient leaves the hospital LANGE *After the ICU Multidisciplinary Perspectives on Supporting Critical Illness Survivors* fills a gap in the existing literature on the subject Arranged in three sections the book addresses the ways in which care in the ICU can impact life afterwards and provides a framework for the recovery process The early chapters feature personal stories from patients describing their life threatening illness journey to recovery and the clinicians who helped them along the way In the following chapters clinicians physicians nurses and patients family members share their unique perspectives on the recovery process Each chapter includes a specific section dedicated to tips for clinicians Includes key concepts of care across the arc of the ICU patient encounter Evidence based interventions are presented and summarized in a practical stepwise approach Features accounts from patients clinicians physicians nurses and others involved in the care and recovery process *Journal of Palliative Care* ,2003 *Pediatric Palliative Care: Global Perspectives* Caprice Knapp, Vanessa Madden, Susan Fowler-Kerry, 2012-01-03 The first of its kind this book describes pediatric palliative care in more than 23 countries Each region in the world is covered and countries included are both resource poor and rich Authors are multidisciplinary and regarded nationally and internationally in their field Clinicians advocates policymakers funders and researchers will learn how programs were developed and implemented in each country Authors describe children for whom pediatric palliative care is needed and provided for in their country When applicable a brief history of pediatric palliative care is included noting especially policy changes and legislative acts For example the chapter on Poland describes how pediatric palliative care grew from the Catholic church into a national movement spearheaded by several health care workers The Pole national spirit that brought them through a change in political regime has also been a driving force in the pediatric palliative care movement The chapter on South Africa for example illustrates how a resource poor country has been able to leverage philanthropic and government funding to make its dream of having an infrastructure of pediatric palliative care a reality These are just a few examples of the inspiring stories that are included in this book Readers from countries who wish to start a pediatric palliative care program or advance an existing program will learn valuable lessons from others who have faced similar barriers Introduction and concluding chapters highlight the strengths and weaknesses of the modern pediatric palliative care movement **Rethinking palliative care** Sinclair, Paul, 2007-04-04 This book s striking message is that palliative care does not deliver on its aims to value people who are dying and make death and dying a natural part of life This book draws from wider social science perspectives and critically and specifically applies these perspectives to palliative care and its dominant medical model

Applying Social Role Valorisation the author argues for the de institutionalisation of palliative care and the development of an alternative framework to the approaches found in hospices palliative care units and community based palliative care services He offers a new conceptualisation of death and loss that refines and expands modern understandings in a way that also resonates with traditional religious views concerning death Wide ranging recommendations advise fundamental change in the concept of palliative care the way support and services are organised and the day to day practice of palliative care Rethinking palliative care will be of interest to academics students and practitioners in palliative care as well as those in disability social policy sociology social work religion thanatology nursing and other health related fields
