Chinese Platforms Jian Lin, Wilfred Yang Wang, Ping Sun, 2025-12-10 The rise of the Chinese internet has reconfigured digital culture around the world From social media platforms such as WeChat and Douyin to utility platforms Didi and Eleme the Chinese platform economy has shown a remarkable capacity to innovate and grow incurring constraints as well as receiving protection from the Chinese state This is the first textbook to centre Chinese platforms in the transformation of the global internet Offering an overview of the history governance and social political implications the book shows how Chinese platforms are situated within the domestic political economy of China and the external geopolitics and cross border mobilities of capital technology and populations Topics covered include policy and governance social media entertainment e commerce digital labour and the Chinese diaspora Comparing and contrasting the Chinese platform ecology with its global counterpart the book argues that while Chinese platforms exhibit more effective economic and technological innovation and have strong cultural cachet they are subject to a far greater degree of state oversight including facilitation as well as correction and censorship Chinese Platforms is a required reading for students of Media and Communication Studies and China Studies as well as those interested in the rise of digital China and the implications for the global platform society **The Goddess**

Introducing Sociology Using the Stuff of Everyday Life Josee Johnston, Kate Cairns, Shyon

Baumann, 2025-10-03 The challenges of teaching a successful introductory sociology course today demand materials very different from the norm. It is a question of making the practice of sociological thinking meaningful, rigorous, and relevant to today's world of undergraduates. This comparatively concise, highly visual, and engaging book offers a refreshingly new way forward to reach students using one of the most powerful tools in a sociologist's teaching arsenal: the familiar stuff in students' everyday lives throughout the world: the jeans they wear to class, the coffee they drink each morning, or the phones their professors tell them to put away during lectures. A focus on consumer culture, seeing the strange in the familiar, is not only interesting for students; it is also, the authors suggest, pedagogically superior to more traditional approaches. By engaging students through their stuff, this book moves beyond teaching about sociology to helping instructors teach the practice of sociological thinking. It moves beyond describing what sociology is so that students can practice what sociological thinking can do. This pedagogy also posits a relationship between teacher and learner that is bi-directional. Many students feel a sense of authority in various areas of consumer culture, and they often enjoy sharing their knowledge with fellow students and with their instructor. Opening up the sociology classroom to discussion of these topics validates students' expertise on their own life worlds. Teachers in turn gain insight from the goods, services, and cultural expectations that shape students' lives. While innovative, the book has been carefully crafted to make it as useful and flexible as possible for instructors aiming to build core sociological foundations in a single semester. A map on pages xix-xx identifies core sociological concepts covered so that a traditional syllabus as well as individual lectures can easily be maintained. Theory, method, and active learning exercises in every chapter constantly encourage the sociological imagination as well as the doing of sociology. This new edition is thoroughly revised and updated, incorporating the latest research around material sociology, culture, and object-oriented studies. New teaching materials and illustrations are included. Online resources to support teaching and learning include videos, flashcards, quizzes, and further reading. Instructor's manual, PowerPoints, and test bank. **Polityka**, 2016
