Curing the Patch Management Headache Felicia M. Wetter, 2005-02-18 A comprehensive security patch management process is one of the fundamental security requirements for any IT dependent organization Fully defining this process ensures that patches are deployed in an organized staged manner resulting in little or no slowdowns or downtime to network infrastructure Until now there were no technical books for companies to use as a starting point for deploying the process *Curing the Patch Management Headache* responds to this demand by tying together all aspects of the subject into one easy to understand format that is applicable regardless of the operating system network device or patch deployment tool This volume provides CISOs CIROs and IT directors and managers with the support and guidance that they need to integrate an effective patch management process into their environments It emphasizes the importance of patch management and explains why having organizational support for the process drives successful implementation The book details how patches should be implemented on devices and systems within an infrastructure and how to distribute them in a timely manner

Information Technology and the World of Work Daphne Gottlieb Taras, James T. Bennett, Anthony M. Townsend, Information technologies have become both a means and an end transforming the workplace and how work is performed This ongoing evolution in the work process has received extensive coverage but relatively little attention has been given to how changing technologies and work practices affect the workers themselves This volume specifically examines the institutional and social environment of the workplaces that information technologies have created Compilations of scholarly essays are often written by members of a particular school of thought whose purpose is to flesh out an area of theory or methodology *Information Technology and the World of Work* takes a different approach these essays are written by diverse voices unified in their interest in the common theme of technology and the changing workplace The authors goals are to present perspectives that raise as many questions as they answer and which are accessible to a broad audience of managers union leaders students and academic readers The chapters are organized into three specific topical areas that represent aspects of workers social and political experiences of work that are affected by technology Part 1 addresses how information technologies affect workers unions Part 2 examines how information technology affects individual employees specifically in terms of employees sense of power and identity Chapters in this section examine the social and psychological reactions of workers within the system Part 3 focuses on one of the most contentious outcomes of this changed workplace reviewing emerging policy and privacy issues that new technologies have created Written with the intent of beginning an important discussion of these issues this volume should provide an impetus for others to make their own contribution to the emerging dialogue on technology in the modern workplace Daphne G Taras is professor of industrial relations and associate dean research in the Haskayne School of Business University of Calgary James T Bennett is professor of economics at George Mason University and founder and editor of the *Journal of Labor Research* Anthony M Townsend is an associate professor of

management information systems in the College of Business at Iowa State University and on the faculty of Iowa State University Industrial Relations Center

A Glocal Town Nicholas Tatsis, 2025-06-30 This book presents a novel theoretical and methodological approach to understanding the emerging glocal realities of sub urban space Beginning with a study of a suburb of Athens it illustrates the dynamic interaction between the local and the global charting a range of radical social changes as this locality adapts itself to processes of globalization Moving beyond the Athenian context it shows how the various traditions of suburban enclaves interact with and confront the impact of external yet pervasive elements of the globalized world for instance through the adoption of events and practices observed in societies across the globe such as Earth Day or International Holocaust Remembrance Day or the use of the global calendar as the polis transforms into a cosmopolis With explorations of this kind A Glocal Town advances a three stage interpretative scheme that enables us to frame glocality more broadly and better understand the global local interaction wherever it occurs As such it will appeal to scholars of sociology geography and urban studies interested in globalization and its interaction with the local in sub urban locales
