Medieval Military Technology Second Edition

Tracey Elizabeth Rihll

Medieval Military Technology Second Edition:

Medieval Military Technology, Second Edition Kelly Robert DeVries, Robert Douglas Smith, 2012-05-01 First published in 1992 *Medieval Military Technology* has become the definitive book in its field garnering much praise and a large readership This thorough update of a classic book regarded as both an excellent overview and an important piece of scholarship includes fully revised content new sections on the use of horses handguns incendiary weapons and siege engines and eighteen new illustrations The four key organizing sections of the book still remain arms and armor artillery fortifications and warships Throughout the authors connect these technologies to broader themes and developments in medieval society as well as to current scholarly and curatorial controversies

Medieval Military Technology Kelly Robert DeVries, Kelly DeVries, Robert Douglas Smith, 2012-01-01 This thorough update of a classic book includes fully revised content new sections on the use of horses handguns incendiary weapons and siege engines and new illustrations

A Cumulative Bibliography of Medieval Military History and Technology, Update 2003-2006 Kelly DeVries, 2008-01-31 This is the second update of *A Cumulative Bibliography of Medieval Military History and Technology* which appeared in 2002 It is meant to do two things to present references to works on medieval military history and technology not included in the first two volumes and to present references to all books and articles published on medieval military history and technology from 2003 to 2006 These references are divided into the same categories as in the first two volumes and cover a chronological period of the same length from late antiquity to 1648 again in order to present a more complete picture of influences on and from the Middle Ages It also continues to cover the same geographical area as the first and second volume in essence Europe and the Middle East or again influences on and from this area The languages of these bibliographical references reflect this geography

The Eurasian Way of War David A. Graff, 2016-03-10 This book is a comparative study of military practice in Sui Tang China and the Byzantine Empire between approximately 600 and 700 CE It covers all aspects of the military art from weapons and battlefield tactics to logistics campaign organization military institutions and the grand strategy of empire Whilst not neglecting the many differences between the Chinese and Byzantines this book highlights the striking similarities in their organizational structures tactical deployments and above all their extremely cautious approach to warfare It shows that contrary to the conventional wisdom positing a straightforward Western way of war and an Oriental approach characterized by evasion and trickery the specifics of Byzantine military practice in the seventh century differed very little from what was known in Tang China It argues that these similarities cannot be explained by diffusion or shared cultural influences which were limited but instead by the need to deal with common problems and confront common enemies in particular the nomadic peoples of the Eurasian steppes Overall this book provides compelling evidence that pragmatic needs may have more influence than deep cultural imperatives in determining a society's way of war

A Cumulative Bibliography of Medieval Military History and Technology Kelly DeVries, 2001-11-01 There is perhaps no other more

lively area for study in medieval history than medieval military history with its attendant and complementary field the history of medieval military technology In the past twenty years it seems that more major scholarly inroads have been made in this field than in any other historical genre of medieval studies or chronological period of military history What this has meant is that it is now more difficult to keep up with all of the trends and sources in the field than ever before Hence the need for a reference work which covers what has previously been written and which in turn can assist the scholar both the more experienced academic and the beginner to improve his or her work in medieval military history or the history of medieval military technology Utilizing library catalogues bibliographies and footnotes this bibliography has compiled the most complete list of secondary references to works in medieval military history and the history of military technology It keeps fairly strictly to a geography which centers on conventional medieval boundaries Europe Byzantium and the Middle East However the chronology does differ from the conventional medieval dates Because of its influence on the early Middle Ages references to Late Antiquity especially to the military history and technology of the third and fourth century Roman Empire have been included For the opposite reason the influence of the Middle Ages on the sixteenth and early seventeenth centuries references to military history and technology up to 1648 have been included as well This is especially important in the study of the Ottoman Turkish Wars and Arms and Armor where the end of the fifteenth century as a chronological terminus makes little sense

Joan of Arc Scott Manning, 2023-01-09 Joan of Arc is the most recognizable woman from medieval Europe yet the details of her life remain obscure to the general public while heavily debated by specialists Rising from obscurity to insert herself into the court of French King Charles VII before marching with his armies to combat the enemies of the crown during the Hundred Years War she was eventually captured tried in an inquisition and then executed as a relapsed heretic at the age of 19 Joan of Arc A Reference Guide of Her Life and Works focuses on her life and legacy It features a chronology an introduction offers a brief account of her life a dictionary section lists entries on people groups places events topics terms and medieval documents central to Joan's life including her letters contemporary perspectives her condemnation trial and the nullification proceedings eventually blessed by the pope to overturn the verdict of the condemnation trial This book aims to provide an understanding not just of Joan but of the culture that produced and ultimately destroyed her

Warfare in Medieval Europe c.400-c.1453 Bernard S. Bachrach, David S. Bachrach, 2021-08-30 Warfare in Medieval Europe now in its second edition offers considerably more attention to the transition from the later Roman Empire to the early Middle Ages the composition of the armies of the opponents of the West and the experience of commanders and individual combatants on the battlefield This second revised and expanded edition provides a more in depth thematic discussion of the nature and conduct of war with an emphasis on its overall impact on society from the late Roman Empire to the end of the Hundred Years War The authors explore the origins of the institutions physical infrastructure and intellectual underpinnings of warfare with chapters on military topography military technology

logistics combat and strategy Bernard and David Bachrach have also added a new chapter which provides two detailed campaign narratives that highlight the themes treated throughout the text The geographical scope of the volume encompasses Latin Europe the Slavic World Scandinavia and the eastern Mediterranean with a particular focus on the conflict between Western Christianity and the Islamic Near East Written in an accessible and engaging way Warfare in Medieval Europe is the ideal resource for all students of the history of medieval warfare

Science and Technology in World History, Volume 2 David Deming, 2010-05-27 In an accurate historical treatment it is impossible to pinpoint a definition of science that applies to multiple moments in time Science is a living organic activity and the meaning and understanding of science has evolved incrementally over several centuries

Technology and Religion in Medieval Sweden Anna Götlin, 1993 Armies of the Dark Ages, 600-1066 Ian Heath, 1980 Cumulative Bibliography of Medieval Military History and Technology (On CD-ROM) Kelly DeVries, 2004-12 This is the first update of A Cumulative Bibliography of Medieval Military History and Technology which originally appeared on CD ROM in 2003 and the contents of which are included here The updated CD ROM presents further references to works on medieval military history and technology not included on the first CD ROM as well as references to all books and articles published on medieval military history and technology from 2000 to 2002 All references old and new are divided into the same categories as on the first CD ROM and cover a chronological period of the same length from late antiquity to 1648 again in order to present a more complete picture of influences on and from the Middle Ages The update also spans the same geographical area as the first CD ROM in essence Europe and the Middle East or again influences on and from this area The languages of these bibliographical references reflect this geography The CD ROM uses a Verity search engine and will be updated regularly at least 800 new entries anticipated for each new issue of the CD ROM Subscribers will receive updates automatically The new materials included appeared in print as volume 26 in the series History of Warfare ISBN 90 04 14040 9

The Catapult Tracey Elizabeth Rihl, 2007 A Major Contribution to the History of Technology and Ancient Warfare The most recognized military device of ancient times and the source of continued fascination and popular appeal the catapult represented a major shift in the conduct of warfare In The Catapult A History historian Tracey Rihl uses ancient sources and the latest archaeological findings to tell the story of this first machine of war Dispelling any notion that the catapult was precision engineered in the modern sense the author explains how a robust formulaic design allowed a variety of machines and missiles to be built and used for particular battlefield conditions or military tasks Complete with original illustrations maps and two appendices detailing both the formulas for catapult construction and known catapult remains The Catapult is essential reading for those interested in the history of warfare and technology

The Oxford Encyclopedia of Medieval Warfare and Military Technology Clifford J. Rogers, 2010 From the Viking invasions to the Crusades to the Hundred Years War wars were crucial agents of change in medieval Europe They fostered many economic and political changes They also affected the science

technology religion and culture of the parties involved Examines all aspects of warfare and military technology in medieval times and provides an exhaustive and accurate view of how and why wars were waged throughout Europe the Byzantine Empire and the Crusader States from circa 500 CE to circa 1500 The Sieges of the Fourth War of Religion in France (1572-1573) Malcolm Wallace McDonald,1980 **The Journal of Medieval and Early Modern Studies** ,2000 The Art of War in Spain William Hickling Prescott,1995 The 1492 conquest of Granada in southern Spain is crucial to a proper understanding of the development of Western European warfare The culmination of a long struggle between the Muslim and Christian cultures in Western Europe it was the training ground for the armed forces that were to make Spain the dominant military power in Europe throughout the sixteenth century It also set the stage for the discovery of the New World it was the war that had to be won before Ferdinand and Isabella would agree to sponsor Columbus s momentous voyage William Prescott s absorbing account of the War of Granada is now set in context by Albert D McJoynt who examines the role of the conquest of Granada in Spanish warfare and its influence on Western Europe Military histories in English have tended to neglect Spain s experience in Granada causing a critical gap in awareness of the factors that led to its military strength in Europe after the Italian Wars of the late fifteenth and early sixteenth centuries Far from merely copying their adversaries techniques during these wars as has often been assumed the Spanish armed forces had already adopted most of the advances that took Spanish warfare from the medieval to early modern stage *The Academy and Literature* Charles Edward Cutts Birch Appleton,Charles Edward Doble,James Sutherland Cotton,Charles Lewis Hind,William Teignmouth Shore,Alfred Bruce Douglas,Ellis Ashmead-Bartlett,Thomas William Hodgson Crosland,1899 **The Academy** ,1899 **Choice** ,2007 **Library Journal** ,1988
