Robots Martin Ford argues that the true revolution is yet to come In this sequel to his prescient New York Times bestseller *Rise of the Robots* Ford presents us with a striking vision of the very near future He argues that AI is a uniquely powerful technology that is altering every dimension of human life often for the better For example advanced science is being done by machines solving devilish problems in molecular biology that humans could not and AI can help us fight climate change or the next pandemic It also has a capacity for profound harm Deep fakes AI generated audio or video of events that never happened are poised to cause havoc throughout society AI empowers authoritarian regimes like China with unprecedented mechanisms for social control And AI can be deeply biased learning bigoted attitudes from us and perpetuating them In short this is not a technology to simply embrace or let others worry about The machines are coming and they won t stop and each of us needs to know what that means if we are to thrive in the twenty first century And *Rule of the Robots* is the essential guide to all of it both AI and the future of our economy our politics our lives
