## **Productivity Planner Near Me Open Now:**

*The National Planning Policy Framework* Great Britain: Parliament: House of Commons: Communities and Local Government Committee, 2011-12-21 This report recommends that a default answer of yes to development should be removed from the National Planning Policy Framework NPFF The phrase significantly and demonstrably must also be removed from the presumption that all planning applications should be approved unless the adverse effects significantly and demonstrably outweigh the benefits because it adds a further barrier to the achievement of truly sustainable development The definition of sustainable development is inadequate and often conflated with sustainable economic growth The framework gives the impression that greater emphasis should be given in planning decisions to economic growth undermining the equally important environmental and social elements of the planning system The NPPF should require local planning decisions to be taken in accordance with the presumption in favour of sustainable development consistent with Local Plans It is unacceptable that so many parts of England have yet to develop and adopt a new Local Plan Clarity within the NPPF has suffered in the pursuit of brevity Inconsistent drafting could create gaps in planning policy or guidance that could lead to a huge expansion in the size of Local Plans as local authorities attempt to plug those gaps The test for viability as currently worded risks allowing unsustainable developments to go ahead if measures to make them sustainable are deemed to make them unviable for the developer MPs also call for a sensible transition period to give local authorities time to put Local Plans in place where they have not already done so

**Re-Imagining Resilient Productive Landscapes** Carla Brisotto, Fabiano Lemes de Oliveira, 2022-03-09 This book explores how lessons from past urban planning experiences can inform current debates on urban agriculture Productive landscapes today have been posited as instruments for the positive transformation related to territorial fragility and abandonment promoting social cohesion food security and wider environmental and economic benefits The book will re map the way in which seeming landscape limitations and challenges can be turned into potential innovation and a new lease of urban rural life It does so by drawing on significant past urban agricultural experiences in planning as vectors for new critical reflections relevant to re igniting ideas for future envisioning of urban scenarios in which productive landscapes play fundamental transformative roles The focus is on planning ideas and the roles of key individual planners all of which have designed agricultural strategies for the city at some point in their careers It intends to help us today reimagine urban rural relationships and the transformation of under or mis used urban open spaces peri urban areas fringe conditions and in between spaces
