**Drilling Down: Turning Customer Data into Profits with a Spreadsheet** Jim Novo, 2004-06-18 I spend a lot of time in marketing oriented discussion lists. If you do you probably also sense the incredible frustration of people who keep asking about using their customer data to retain customers and increase profits. Everybody knows they should be doing it but can't find out how to do it. Consultants and agencies make this process sound like some kind of black magic something you can't possibly do yourself. I disagree. I think the average business owner can do a perfectly decent job creating profiles and using them to retain customers and drive profits. Thus the book. The examples provided are Internet specific but the methods can be used in any business where customer data is available. This book is about the down and dirty nitty gritty art of taking chunks of data generated by your customers and making sense of it getting it to speak to you creating insight into what types of marketing or general business actions you can take to make your business more profitable. We'll be talking about action oriented ideas you can generate on your own to drive sales and profits ideas that will reveal themselves by analyzing your own customer data using only a spreadsheet. We have all heard how important it is to collect customer data to know your customer. What I don't hear much about is what exactly you DO with all that data once you have collected it. How is it used? What exactly is 'Drilling Down' into the data supposed to tell me and what am I looking for when I get there? For that matter what data should I be collecting and how will I use it when I have it? And how much is this process going to cost me? The following list outlines what you will learn and be able to do after reading the *Drilling Down* book. What data is important to collect about a customer and what data is not? How to create action oriented customer profiles with an Excel spreadsheet. How to use these profiles to plan marketing promotions. How to use these profiles to define the future value of your customers. How to use these profiles to measure the general health of your business. How to use these profiles to encourage customers to do what you want them to. How to predict when a customer is about to defect and leave you. How to increase your profits while decreasing your marketing costs. How to design high ROI Return on Investment marketing promotions. How to blow away investors with predictions of the future profitability of your business.
