World Records for Nerds Guide Book: Jaw Dropping Human Feats, Geek-Level Detail The Ultimate Tour of World Records
Matt Kingsley, 2025-12-15 This isn't a dry list of stats. It's a tour through the wildest, weirdest, most mind-bending records on the planet, each one translated into a story that makes the number actually mean something. You meet the people behind the digits: the memory freak who can recite thousands of numbers on demand, the endurance runner who treats a marathon as a warm-up, the obsessive collector whose hobby quietly turned into 24,000 video games or 20,000 teddy bears. You get the distances, times, and totals, but you also get the human wiring that made them possible. Here's what makes this book sell: It's organised for binge-reading, chapters on brain power, human limits, money, tech, animals, cities, food, strange sports, and more, each written like a late-night conversation, not an encyclopedia. Every record is real and named, documented feats, actual people, actual achievements, no vague "someone once did fluff." It's secretly motivational after you've read enough about marathon streaks, impossible cubes, and micro-records you can try at home. You start seeing your own life as a series of personal bests waiting to be set. It's built for re-reads and sharing, perfect did-you-know ammo for classrooms, offices, family dinners, YouTube scripts, podcast segments, and pub quizzes. If you sell books, this one hits multiple audiences at once: teenagers who love crazy facts, adults who grew up with record annuals, teachers and youth workers looking for engaging material, trivia fans, sports nuts, STEM geeks, and content creators hunting for story fuel. It works as a coffee-table browser, a reference for writers, or a gift for the hard-to-buy-for nerd that actually gets opened. Position it like this: The most entertaining way to learn just how far humans and the planet can be pushed. A record book written in plain language with personality, not corporate press-release tone. A launchpad for your own experiments, challenges, and personal records. Put it in front of anyone who loves numbers, stories, and extremes, and it will do the rest.

Digital Diplomacy in Indonesia's Foreign Policy

Albert Triwibowo, 2025-06-02 This book introduces the developments and practices of digital diplomacy in Indonesia's foreign policy to support diplomatic practice. The analysis focuses on Indonesia's digital diplomacy, specifically its implementation by the Indonesian Ministry of Foreign Affairs and its Missions in selected locations to achieve the country's foreign policy objectives. Specific case studies on palm oil, the Rohingya crisis, and the COVID-19 pandemic are used to show how Indonesia's digital diplomacy is executed and performed. Arguing that Indonesian digital diplomacy follows a bottom-up approach model in its development, the author demonstrates that Indonesia's digital diplomacy is related to state-to-state communication as well as state-to-public communication. It is also utilised for communicating sensitive issues as Indonesia is still in the first stage of digital diplomacy and is influenced by domestic interests, counternarrative interests, and information dissemination motives. The book is a valuable addition to the study of digital diplomacy, specifically from the experience and perspective of a middle power country. It will be of interest to researchers in International Relations, Asian Politics.

Employee Costs and the Decline in Health Insurance Coverage David M. Cutler,2002 This paper examines why health insurance coverage fell despite the lengthy economic boom of the 1990s I show that insurance coverage declined primarily because fewer workers took up coverage when offered it not because fewer workers were offered insurance or were eligible for it The reduction in take up is associated with the increase in employee costs for health insurance Estimates suggest that increased costs to employees can explain the entire decline in take up rates in the 1990s *Tenaga fungsional non peneliti Badan Penelitian dan Pengembangan Pertanian* ,2011
