Enterprise Microservices with Java and Spring Boot: Architecture, Deployment, and Real-World Patterns

2025 AUTHOR:1- Rajeev Kumar Sharma AUTHOR:1- Prof. Dr. Vishwadeepak Singh Baghela, PREFACE Over the past decade enterprise software has undergone a seismic shift Immense monoliths that once sat at the heart of corporate data centers are being replaced by fleets of independently deployable cloud native services Java fortified by the Spring ecosystem has emerged as one of the most dependable platforms for building these systems while Kubernetes GitOps and progressive delivery tooling have rewritten the rules for shipping them at speed and scale Enterprise Microservices with Java and Spring Boot is our field guide to this new landscape It is the book we wished we had when we were first asked to untangle ageing JEE applications introduce continuous delivery or harden mission critical APIs against unpredictable traffic and failure scenarios Inside we move deliberately from first principles to battle tested practices Architecture We lay out modern domain driven patterns polyglot persistence strategies and the realities of eventual consistency sagas and CQRS You will see where theory collides with organizational structure Conway's Law and the demands of regulatory compliance Deployment Containers Helm GitOps and service meshes form the backbone of today's delivery pipelines We walk through multi stage Docker builds cluster wide security automated SCA SAST gates and cost aware autoscaling always with running code and YAML you can lift into production Real World Patterns Circuit breakers bulkheads graceful degradation observability and chaos testing are explored through Resilience4j Micrometer Open Telemetry and Litmus Chaos complete with metrics dashboards and alert rules that have saved our teams at 3 a m Our perspective is intentionally pragmatic Rajeev's years

architecting high throughput fintech platforms and Vishwadeepak's research and teaching on distributed systems converge here. Every chapter concludes with war stories, successful experiments, painful missteps, and the lessons behind both that readers can accelerate past pitfalls and focus on what matters: delivering reliable, evolvable business value. This book targets senior developers, solution architects, and DevOps engineers who already know Java and Spring Boot but need a cohesive playbook for building and operating microservices at enterprise scale. If you are stepping into green field cloud work, modernising a brown field monolith, or mentoring a team on their platform journey, we hope these pages provide both inspiration and an uncompromisingly practical toolkit. Software never stands still; neither should we. May the patterns and principles captured here help you design systems that endure, empower teams that thrive, and delight the users who rely on them every day.

Authors: Rajeev Kumar Sharma, Prof. Dr. Vishwadeepak Singh Baghela **Urban Mobility** Shauna Brail, Betsy Donald, 2024-08-30

Urban Mobility sheds light on mobility in twenty-first century Canadian cities. The book explores the profound changes associated with technological innovation, pandemic-induced impacts on travel behaviour, and the urgent need for mobility to respond meaningfully to the climate crisis. Featuring contributions from leading Canadian and American scholars and researchers, this edited collection traverses disciplines including geography, engineering, management, policy studies, political science, and urban planning. Chapters illuminate novel research findings related to a variety of modes of mobility, including public transit, e-scooters, bike sharing, ride hailing, and autonomous vehicles. Contributors draw out the connections between urban challenges, technological change, societal need, and governance mechanisms. The collection demonstrates why the smart phone, COVID-19, and climate present a crucial lens through which we can understand the present and future of urban mobility. The way we move in cities has been disrupted and altered because of technological innovation, the lingering impacts of COVID-19, and efforts to reduce transport-related emissions. Urban Mobility concludes that the path forward requires good public policy from all levels of government working in partnership with the private sector and non-profits to direct and address the best urban mobility framework for Canadian cities.
