bioarchaeological and geophysical techniques of remote sensing are fully applicable to tropical sites Additionally the comprehensive use of such techniques by all archaeologists doing fieldwork anywhere could revolutionize archaeology allowing archaeologists to look inside sites rather than simply excavate them Using a variety of remote sensing techniques Roosevelt documents the existence of a major moundbuilding culture possessing monumental architecture and a rich artistic tradition on the lowland tropical floodplain of Marajo Island at the mouth of the Amazon River in Brazil from about 400 A D to about 1 300 A D Marajo Island at the mouth of the Amazon River is about the same size as Switzerland or Belgium A well developed civilization existed there from about 400 A D to 1 300 A D comparable in many ways to the Inca civilization to the west or to the Aztec and Maya cultures to the north or in some interesting ways to the Pharonic cultures which developed at the mouth of the Nile Because this civilization had no stone at its disposal it expressed its monumental architecture in packed dirt which washed back into the alluvial floodplain long ago effectively preventing archaeological discovery until the recent development of sophisticated techniques of remote sensing and reconstruction Key Features Reports on the most extensive stratigraphic excavations ever of an ancient Amazonian civilization adapted to a floodplain environment Introduces the first use of geophysics for archaeology in non specialized language Illustrates for the first time the elaborate art of a complex society that was indigenous to the tropical lowlands Describes monumental sites rich polychrome pottery and the first extensive biological remains ever recovered in an Amazonian site Proves that sophisticated archaeological bioarchaeological and geophysical techniques of remote sensing are fully applicable to tropical sites Shows that the comprehensive use of such methods could revolutionize archaeology by allowing archaeologists to look inside sites rather than simply excavate them Provides examples which prove that the theories about the limitations of the tropical environment for cultural evolution are simply untrue and were based on faulty knowledge of the region and its archaeology **The Amazon** Caryl Parker Haskins,1943 [Amazon and the Rise of E-commerce](#) 50minutes,2017-09-22 Find out how Amazon conquered the world in just 50 minutes In less than two decades Amazon grew from a startup to become the world leader in online shopping with hundreds of millions of customers around the world However the future did not always look so bright for the internet giant its unconventional business model initially left investors worried and it had to overcome the burst of the internet bubble that led to the collapse of many other young tech companies In this concise and accessible guide you will find out how Jeff Bezos was able to steer Amazon from its humble beginnings in a garage in Seattle to its current position as one of the most influential companies in the world In 50 minutes you will Learn about Amazon s history from 1994 right up to the present day Understand its innovative business model and find out why it was so successful Identify the opportunities and challenges for online shopping in the future ABOUT 50MINUTES COM BUSINESS STORIES The Business Stories series from the 50Minutes collection provides the tools to quickly understand the innovative companies that have shaped the modern business world Our publications will give you contextual information an analysis of business strategies and an introduction to
