sciences have a free ChatGPT account the highest for faculty of any field in the sample The data for this 134 page report is derived from a representative sample of 731 higher education faculty in the USA It presented in the aggregate and also broken out by institutional characteristics of the respondent s institutions such as enrollment sizes Carnegie classes public or private status and tuition levels as well as by some personal characteristics of the respondents such as their age gender academic field and other variables **How to Survive ChatGPT: A Comprehensive Guide to AI-Assisted Conversations** Alfonso Borello, Discover the Power of ChatGPT How to Survive ChatGPT A Comprehensive Guide to AI Assisted Conversations In this guide you ll explore the endless possibilities of ChatGPT and how it can revolutionize the way you interact with technology You ll learn how ChatGPT can assist you in research provide valuable insights automate tasks and enhance your overall productivity With real life examples and practical use cases you ll be equipped with the knowledge and skills to leverage ChatGPT s capabilities to their fullest potential Join us on a journey into the world of AI assisted conversations and unlock the full potential of your interactions You ll learn How to implement ChatGPT in customer service to improve engagement and satisfaction Using ChatGPT to analyze and interpret complex data sets for business decision making Innovative approaches to personalized learning using ChatGPT technology Addressing ethical considerations in AI development and implementation with ChatGPT Leveraging ChatGPT to provide support and resources for mental health and well being Improving accessibility with ChatGPT for people with disabilities in various industries Exploring the potential of ChatGPT in generating new ideas and enhancing creativity for innovation Keywords Artificial intelligence Natural language processing Deep learning Conversational AI OpenAI GPT 3 Language model Machine learning **Could ChatGPT Win the UK University Challenge and US College Bowl Competitions? Yes- Most Probably by KO.** Rupert Macey-Dare,2023 This paper tests and whether ChatGPT could win the UK University Challenge and US College Bowl competitions Rerunning simulations of the latest 2022 University Challenge Final but now also including ChatGPT we find that ChatGPT would be much more than just competitive and in fact most likely to win any individual contest or competition Final decisively by KO The paper then considers what these results imply for human general knowledge look up recollection retention and selection type exams and academic and professional education more generally For the last 60 or so years perhaps the ultimate test of British student and university intellectual prowess in the minds of the general public has been the annual knockout University Challenge competition shown initially from 1962 to 1987 on ITV and from 1994 to present on the BBC Quick calculations suggest that somewhere of the order of 50 000 intellectual college students may have participated in shows such as University Challenge and College Bowl which in turn must have been watched by 10s or 100s of millions of global viewers University Challenge and related competitions have thus commanded long term great public interest as a yardstick of student intellectual prowess under pressure But now many new pretenders have arrived on the scene and are rattling the gates of the ivory towers of academia namely AI systems such as ChatGPT nurtured at intellectual development corporations such as

OpenAI Inc ChatGPT launched in autumn 2022 has already acquitted itself well sometimes better than college students on a number of standardized US exams but arguably the real test of credibility of course is how well ChatGPT can tackle the ultimate challenge for student geniuses namely University Challenge itself To test this we have used a 2 stage process to rerun the 2022 University Challenge Final with an additional 3rd competitive team namely ChatGPT Firstly all questions and answers and gameplay from the 2022 University College Final between Imperial College London and Reading University were captured and recorded on a script Secondly all the same questions in the same order were posed to ChatGPT and its answers recorded and scored for accuracy The contest was then rescored as a 3 way competition between ChatGPT Imperial Reading and also as 2 additional standalone 2 way contests between ChatGPT v Imperial and for ChatGPT v Reading Scripts for the questions and answers for each of these 4 contests one original and 3 new and synthetic are included in the Appendices so that the reader can compare and contrast the different strengths and weaknesses and depths of apparent knowledge of the 3 teams The results of these 3 test reruns are decisive with ChatGPT winning by a significant margin in the synthetic 3 way match and actually destroying each opponent by KO in the 2 way matches This implies that for traditional type University Challenge and College Bowl type competitions modern AI systems such as ChatGPT are already significantly better than their human adversaries This in turn implies that AI systems including LLMs Large Language Models such as ChatGPT could easily compete directly and in real time in games such as University Challenge perhaps with their responses in turn delivered using AI e g via Avatar or simulation and deep fake type technology It also implies that contests such as University Challenge may have to be made more complex and have their focus shifted to be relatively harder for AI systems and allow humans to retain some inherent advantage in future It also implies that there is a huge risk of AI assisted cheating in any exam type tests that are analogous to University Challenge in requiring the selection of data from a retained memory database or selection of the best answer from a set of possibilities based on knowledge data More broadly and existentially it does raise the question of whether and to what degree it is now useful or efficient for humans to memorize and process huge amounts of knowledge data in everyday life including in professional and academic contexts now that this may be achieved much more efficiently in terms of both time and cost and effectively by available assisting machines In a postcript we also consider University Challenge and College Bowl in the broader sporting and tv contexts of other competitive team university and professional sports including chess soccer rowing college basketball and NBA and college American football and NFL
