Lombardi,Elizabeth D. Capaldi,Craig W. Abbey,2007 Rankings and the Reshaping of Higher Education Ellen Hazelkorn,2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation This second edition updates Ellen Hazelkorn s first comprehensive study of rankings from a global perspective drawing in new original research and extensive analysis It is essential reading for policymakers managers and scholars **Breaking Ranks** Colin Diver,2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional

measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality *America's Best Graduate Schools* ,2011 The Evidence for Quality Ernest Grady Bogue,Robert L. Saunders,1992 What is the mission of the American college Is it reasonable to expect to measure quality in our collegiate system How do we adequately assess quality and still allow for diversity In *The Evidence for Quality* E Grady Bogue and Robert L Saunders answer these and other compelling questions as they take a comprehensive look at how quality is measured and how information on quality contributes to academic decision making The book offers a synthesis of practices and policies in collegiate quality assurance examining a range of contemporary approaches that include accreditation student feedback professional licensure college rankings and ratings and other measures of academic quality Bogue and Saunders offer a quality assurance model that links principles of good practice to a strategic unifying vision of quality They evaluate the strengths and weaknesses of each approach and show how each makes a contribution to academic decision making They draw on examples from numerous colleges and universities to demonstrate how various institutions developed strategic and effective quality assurance programs And they set forth guidelines for all educators who are dedicated to developing a superior program of quality assurance that is as unique as their individual campus BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Selling Higher Education: Marketing and Advertising America's Colleges and Universities* Eric J. Anctil,2008-09-16 Confronting an era marked by dwindling support and increased competition it is incumbent on administrators and higher education leaders at colleges and universities to broadcast who they are what they do and what makes them valuable In his direct unvarnished review of marketing higher education Eric J Anctil offers a critical call to action for institutions who wish to continue and thrive in the business of higher education Topics covered include Market Driven Versus Mission Driven Persuasion and Choice Marketing and Advertising Higher Education Marketing and Advertising the Intangible Market Differentiation Recommendations for Selling Higher Education To be viable in the modern era today s colleges and universities must strike a balance among delivering sound academic programs conducting and promoting research and engaging with the community as social institutions and places of higher learning while also meeting the contemporary challenges of running large organizations with dwindling public support and greater competition from the for profit education sector Colleges and universities that are not only aware of this environment but also are savvy in the changing marketplace increase their changes of establishing

distinction among their peers Strong institutional identity requires clearly recognizing one s organizational strengths effectively communicating how one is different in a crowded marketplace and building collaborative partnerships both internally and externally to promote greater awareness and recognition among key stakeholders Strategic marketing enables one to move from being simply driven by the market to being savvy about it This monograph is an invaluable guide to that process This is the second issue in the 34th volume of the Jossey Bass series ASHE Higher Education Report Each monograph in the series is the definitive analysis of a tough higher education problem based on thorough research of pertinent literature and institutional experiences Topics are identified by a national survey Noted practitioners and scholars are then commissioned to write the reports with experts providing critical reviews of each manuscript before publication
