Popular Sovereignty in a Digital Age Aaron Schneider, 2024-08-01 In the evolution of global capitalism and geopolitics digitalization presents a new and yet unresolved chapter In the lead up to digitalization neoliberalism weakened the welfare states of the global North and the developmental states of the global South where they existed Neoliberalism also disorganized working classes as Left parties and labor organization declined across the globe Into this deregulated and unchecked context digitalization proceeded and technology companies inserted themselves into multiple sectors making use of first mover advantage and monopolistic practices to drive out smaller and less advanced firms We can now characterize a landscape in which states have been weakened working classes disorganized and rival firms greatly handicapped allowing big tech to operate as all powerful quasi monopolies They enjoy unprecedented concentration of wealth power and advantage Worryingly deregulated technology now penetrates many areas of life with surveillance and control setting us on a path towards anti democratic neo imperial and exclusionary futures Aaron Schneider offers a popular and sovereign alternative with particular focus on labor and the global South
