Aviation DCA he had had many valuable experiences However the two biggest tragedies that occurred in 2014 that of MH370 and MH17 had the greatest impact on his life and affected not just the victims and their families but the entire Malaysian aviation industry Azharuddin was directly involved in leading the search missions of the tragic disappearance of MH370 on 8 March 2014 and in a series of investigations concerning the downing of MH17 in eastern Ukraine on 17 July of the same year As Director General Azharuddin faced a heavy burden in the aftermath of the twin disasters of which MH370 remains unsolved to the present day No one was prepared for the MH370 tragedy despite all the training they had received As for MH17 Azharuddin laments that the tragedy may have been prevented had full information on the level of conflict in Ukraine been made available during that time In both cases all passengers and crew on board were killed Both tragic events marked a new history in the aviation industry both in Malaysia and in the international arena causing new reforms to burst into action to ensure similar incidents will not happen again In writing this book Azharuddin draws from personal experience conducting his research with and around aviation industry professionals and drawing insights from others involved in both incidents to present a full and raw take on the twin disasters of the Malaysian aviation industry in 2014

Choisser,2014 The missing flight isn t in the news quite as much now The pings have stopped and the search is entering a second much slower phase The unanswered questions are many But by most accounts it is being assumed that the pilots are criminals suicidal maniacs hijackers or terrorists since no one else on the airplane appears to fit those descriptions It may be a long time before we know for sure but in the meantime I believe the public and particularly the pilot s families need to know that there is a high likelihood that they are victims and heroic victims at that The purpose of this book is also not to place blame on anyone in particular although as we ll see there might have been an opportunity to save the airplane In the news there does not seem to be much credibility given to the possibility that what happened was an accident A rare accident we hope but an accident nonetheless But even given an accident can blame be placed for making the situation worse Could there have been negligence in avoiding the escalation of an accident into a disaster I say yes I believe we can place blame for this and it s not on the pilots Knowing more about how the airplane and its various systems work will help members of the public more accurately judge the relevancy of the various scenarios being discussed I can imagine some of my friend s eyes glazing over while reading some of the technical information presented in this book And skimming over those sections or skipping them is OK But these are the bases for the conclusions I reach so you can either read them or take them on faith This kind of knowledge will also answer questions like why didn t the passengers answer their cell phones and was someone hiding in the cargo bay and how can the airplane fly by itself and a hacker got into the flight computer and flew the airplane If we keep speculation grounded in the real world based on how things actually work and don t work some of the more realistic theories can be better evaluated That s why there is so much engineering stuff in

this book which you may want to skip over It s there as much to explain what is impossible as much as what things are possible My hypothesis is that the pilots are heroes Lost in the dark without flight instruments with smoke in the cockpit flying under extreme stress and awesome responsibility and hoping against hope to see a fighter interceptor outside their window to guide them home they knew the minutes left on their oxygen system were numbered They have not survived their ordeal and in my opinion died trying to save the flight And this small book will not bring solace to the families of the rest of the crew and passengers But the dedicated effort the pilots and crew probably made amidst the terror and confusion may be worthy of hero status I feel for all of the victims families but especially for the families of the pilots who are not only grieving but whose probably heroic loved ones are perhaps necessarily but unfortunately being labeled otherwise     *Applied Science & Technology Index* ,1983     *Outing* ,1900     **American Machinist** ,1929     **The Builder** ,1888     **Aeronautical Engineering: A Cumulative Index to a Continuing Bibliography (supplement 261)** ,1991     *Flight* ,1956     Flight International ,1964     **Sainik Samachar** ,2014     **Material Handling Engineering** ,1969     *Flight and Aircraft Engineer* ,1956
