Mismeasuring Schools' Vital Signs Steve Rees, Jill Wynns, 2022-09-29 This book helps school and district leaders avoid the pitfalls that await those making sense of their school's data. Whether you're interpreting achievement gaps, graduation rates, or test results, you're at risk of reaching a mistaken judgment. By learning about common errors and how they're made, you'll be ready to choose safer, surer paths to making better sense of the wealth of data in your school or district. The authors help educators build better evidence, see conclusions more clearly, and explain the data more persuasively. Special features include Questions to Spark Discussion in each chapter, encourage school site, district leaders, and board trustees to apply each chapter's content to their own situations. Data visualizations, together with the authors' interpretations, will help you learn how to do visual analysis and reach the right conclusions. Practical tips provide clear guidance. Supplemental resources can be found at the book's website [k12measures.com](http://k12measures.com), including interactive data visualizations and analytic exercises to help you learn a concept by doing.

Reimagining the P-20 Landscape for School Leadership Learning Bailey Watters, Jennifer Miller, Gary J. Rhone, Ron, 2024-12-20 Enhancing school leadership through innovative and effective professional learning practices is critical for improving education at all levels. By exploring new methods and pedagogical approaches, educators and leaders can better support the development of leadership skills within the P-20 community. Strengthening school leadership not only improves decision making and school outcomes but also fosters a culture of continuous improvement and student success. This focus on leadership efficacy has a lasting impact on educational quality and equity, benefiting communities and society as a whole. Reimagining the P-20 Landscape for School Leadership Learning provides a collection of theoretical, conceptual, and empirical research on innovative and engaging practices, methods, and pedagogy for school leadership professional learning. It seeks to improve the landscape of methods and pedagogical approaches for leadership development among the P-20 community in supporting school leaders and advancing leadership efficiency. Covering topics such as competence development, online education, and virtual reality, this book is an excellent resource for practitioners, professionals, researchers, policy advisors, and more.

**Psychology and Mathematics Education** Gila Hanna, Laura Macchi, Karin Binder, Laura Martignon, Katharina Loibl, 2023-09-05 Modern Mathematics is constructed rigorously through proofs based on truths which are either axioms or previously proven theorems. Thus, it is par excellence a model of rational inquiry. Links between Cognitive Psychology and Mathematics Education have been particularly strong during the last decades. Indeed, the Enlightenment view of the rational human mind that reasons, makes decisions, and solves problems based on logic and probabilities was shaken during the second half of the twentieth century. Cognitive psychologists discovered that humans' thoughts and actions often deviate from rules imposed by strict normative theories of inference. Yet these deviations should not be called errors, as Cognitive Psychologists have demonstrated these deviations may be either valid heuristics that succeed in the environments in which humans have evolved, or biases that are caused by a lack of adaptation to abstract information formats. Humans as

the cognitive psychologist and economist Herbert Simon claimed do not usually optimize but rather satisfice even when solving problem This Research Topic aims at demonstrating that these insights have had a decisive impact on Mathematics Education We want to stress that we are concerned with the view of bounded rationality that is different from the one espoused by the heuristics and biases program In Simon s bounded rationality and its direct descendant ecological rationality rationality is understood in terms of cognitive success in the world correspondence rather than in terms of conformity to content free norms of coherence e g transitivity *Human Interface and the Management of Information* Sakae Yamamoto,2013-07-01 The three volume set LNCS 8016 8017 and 8018 constitutes the refereed proceedings of the 15th International Conference on Human Computer Interaction HCII 2013 held in Las Vegas NV USA in July 2013 The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of human computer Interaction addressing major advances in knowledge and effective use of computers in a variety of application areas This volume contains papers in the thematic area of human interface and the management of Information addressing the following major topics learning education and skills transfer art and cultural heritage collaborative work business integration and decision support *The Fluency Construct* Kelli D.
