*Vaccines and Diagnostics for Transboundary Animal Diseases* J.A. Roth, J.A. Richt, I.A. Morozov, 2013-04-18 Transboundary animal diseases TADs are a major threat to livestock. They are highly contagious or transmissible and they have the potential to cause high morbidity and mortality in both susceptible animal populations and humans. In addition, not only are TADs detrimental to national economies; they are also a serious threat to world food security. This volume presents the proceedings of an international workshop on Vaccines and Diagnostics for Transboundary Animal Diseases that was held in Ames, Iowa, USA, in 2012. Experts and scientists from academia, industry, and government reviewed the current status of vaccines and diagnostics for high priority TADs, decision making and regulatory processes for veterinary biologics, and the roles and responsibilities of government agencies. The discussions also addressed achievements and gaps in vaccine and diagnostics development for 11 important TADs, as well as the translation of research findings into licensed novel vaccines and diagnostics for high priority TADs. *AIDS Bibliography*, 1995 **Human Respiratory Syncytial Virus Infection** Bernhard Resch, 2011-11-25 In this online Open Access book on Human RSV Infections, several distinguished authors contribute their experience in respiratory syncytial virology. A major focus lies on the fascinating pathophysiology of RSV and represents recent and actual work on different mechanisms involved in the complex pathogenesis of the virus. The second section elucidates epidemiologic and diagnostic aspects of RSV infection, covering a more clinical view of RSV disease. At last, treatment modalities, including the search for a vaccine that is still not in sight, are discussed and conclude this book, thus building up a circle that runs from experimental models of RSV-related lung disease over clinical aspects of disease to the latest news of therapeutic and prophylactic approaches to human RSV infection. **Applied and Environmental Microbiology**, 1992 *Performance of Protective Clothing* Jeffrey O. Stull, 1997 *Oncogenesis and Herpesviruses III: Cell-virus interactions, host response to herpesvirus infection and associated tumours, role of co-factors* G. de Thé, Werner Henle, Fred Rapp, 1978 *Vaccines for Biodefense and Emerging and Neglected Diseases* Alan D.T. Barrett, Lawrence R. Stanberry, 2009-03-05 The last 20 years have seen a rapid increase in infectious diseases, particularly those that are termed emerging diseases such as SARS, neglected diseases such as malaria, and those that are deemed biothreats such as anthrax. It is well recognized that the most effective modality for preventing infectious diseases is vaccination. This book provides researchers with a better understanding of what is currently known about these diseases, including whether there is a vaccine available or under development. It also informs readers of the key issues in development of a vaccine for each disease. Provides a comprehensive treatise of the agents that are responsible for emerging and neglected diseases and those that can be used as biothreats. Includes the processes such as the vaccine development pathway, vaccine manufacturing, and regulatory issues that are critical to the generation of these vaccines to the marketplace. Each chapter will include a map of the world showing where that particular disease is naturally found. *Advances in Viral Oncology*, 1983 *Physical and*
