This comprehensive book delves into cutting edge developments in NLP and Generative AI. It provides insights into the functioning of these technologies their benefits and associated challenges. Targeting students researchers and professionals in AI NLP and computer science this book serves as a vital reference for deepening knowledge of advanced NLP techniques and staying updated on the latest advancements in generative AI. By providing real world examples and practical applications scholars can apply their learnings to solve complex problems across various domains. Embracing Advanced Applications of Generative AI and Natural Language Processing Models equips academic scholars with the necessary knowledge and insights to explore innovative applications and unleash the full potential of generative AI and NLP models for effective problem solving.

**Rethinking Informed Consent in the Big Data Age** Adam J. Andreotta, 2024-12-23 In the big data age providing

informed consent online has never been more challenging Countless companies collect and share our personal data through devices apps and websites fuelling a growing data economy and the emergence of surveillance capitalism Few of us have the time to read the associated privacy policies and terms and conditions and thus are often unaware of how our personal data are being used This is a problem as in the last few years large tech companies have abused our personal data As privacy self management through the mechanism of providing online consent has become increasingly difficult some have argued that surveillance capitalism and the data economy more broadly need to be overthrown This book presents a different perspective It departs from the concept of revolutionary change to focus on pragmatic incremental solutions tailored to everyday contexts It scrutinises how consent is currently sought and provided online and offers suggestions about how online consent practices can be improved upon These include the possibility of subjecting consent gathering practices to ethics committees for review the creation of visual based consent agreements and privacy policies to help with transparency and engagement the development of software to protect privacy and the idea of automated consent functionalities that allow users to bypass the task of reading vast amounts of online consent agreements The author suggests that these small scale changes to online consent obtaining procedures could if successfully implemented provide us with a way of self managing our privacy in a way that avoids a revolutionary dismantling of the data economy In the process readers are encouraged to rethink the very purpose of providing informed consent online Rethinking Informed Consent in the Big Data Age will appeal to researchers in normative ethics applied ethics philosophy of law and the philosophy of AI It will also be of interest to business scholars communication researchers students and those in industry
