 Ariyaratna,2022-09-05 This book examines the challenges posed to Australian copyright law by streaming from the end user
 perspective It compares the Australian position with the European Union and United States to draw lessons from them
 regarding how they have dealt with streaming and copyright By critically examining the technological functionality of
 streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights The rising
 popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings
 cinematographic films and radio and television broadcasts is used on the internet Superseding the conventional method of

downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement These prevailing grey areas between copyright and streaming often make end users feel doubtful about accessing digital content through streaming It is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part Conversely the fair dealing defence in Australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study When considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content s infringing nature Moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking End users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement Despite the intricacies between copyright and access to digital content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users access to digital content This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions
