### DIRECTIONS FOR ADMINISTERING AND KEY FOR SCORING

#### NATURE AND PURPOSE OF THE TEST

The progress young children make when they enter school in the primary grades depends to a large extent upon their readiness for learning and upon the provisions the school makes for variations in readiness. Among the chief factors that contribute to readiness for beginning school-work are linguistic attainments and aptitudes, visual and auditory perception, muscular coördination and motor skills, number knowledge, and the ability to follow directions and to pay attention in group work. How far advanced the school beginner will be in these skills depends upon many factors, such as his intelligence, his home background, his health and physical condition, his degree of emotional maturity, and his social adjustment and general background of experience. Lack of readiness in any of the above traits may account for a pupil's failure to learn in the first grade.

The Metropolitan Readiness Tests were devised to measure the traits and achievements of school beginners that contribute to their readiness for first-grade instruction. Designed for testing pupils at the end of the kindergarten year or the beginning of the first grade, these tests are contained in a sixteen-page booklet comprising six separate tests: Word Meaning, Sentences, Information, Matching, Numbers, and Copying. Each test consists of pictures which the pupil is to mark or copy according to instructions given to him orally by the examiner.

The Metropolitan Readiness Tests are available in two forms, R and S.

#### DESCRIPTION OF THE SUBTESTS

*Test 1. Word Meaning.* This is a test of understanding or comprehension of language — not a test of the pupil's language usage. In each row, the pupil is to select from four pictures the one that illustrates the word the examiner names.

*Test 2. Sentences.* Test 2 is similar in organization to Test 1. However, the pupil is required to comprehend phrases and sentences instead of individual words. The extra conversation, which is not always necessary for the location of the right picture by the pupils, is added to make the test one of more sustained attention, comparable to the attention span required in listening to stories and understanding directions in the beginning work in reading.

*Test 3. Information.* Test 3 is related to vocabulary. The pupil is required to select from a row of four pictures the one that best suits the examiner's description.

*Test 4. Matching.* Test 4 is a test of visual perception involving the recognition of similarities, a capacity required in learning to read. Each item contains four different pictures of animals, objects, figures, letters, or words. In the center of the row is a framed picture just like one of the
