**Left to Their Own Devices** Julie M. Albright,2019-04-16 A sociologist explores the many ways that digital natives interaction with technology has changed their relationship with people places jobs and other stabilizing structures and created a new way of life that is at odds with the American Dream of past generations Digital natives are hacking the American Dream Young people brought up with the Internet smartphones and social media are quickly rendering old habits values behaviors and norms a distant memory creating the greatest generation gap in history In this eye opening book digital sociologist Julie M Albright looks at the many ways in which younger people facilitated by technology are coming untethered from traditional aspirations and ideals and asks What are the effects of being disconnected from traditional stabilizing social structures like churches marriage political parties and long term employment What does it mean to be human when one s ties to people places jobs and societal institutions are weakened or broken displaced by digital hyper connectivity Albright sees both positives and negatives On the one hand mobile connectivity has given digital nomads the unprecedented opportunity to work or live anywhere But new threats to well being are emerging including increased isolation anxiety and loneliness decreased physical exercise ephemeral relationships fragmented attention spans and detachment from the calm of nature In this time of rapid global technologically driven change this book offers fresh insights into the unintended societal and psychological implications of lives exclusively lived in a digital world

**Man Down** Matt Rudd,2020-09-10 The most honest most revealing and funniest exploration of male mental health I have ever read Adam Kay Matt Rudd may have written the most important book in a generation Idle Society On the surface men today don t have much to complain about At work they still get paid more than women for doing the same jobs At home they still shirk most of the unpaid labour Putting the bins out does not count Beneath the surface it s a different story An alarming number of men end up anxious exhausted depressed and very reluctant to admit they are Even if they do everything that s expected of them in work life and fatherhood genuine happiness is still elusive By midlife their levels of stress are higher and their levels of wellbeing are lower and work life balance turns out to be just a cruel illusion The evidence is clear and ironic the system set

up by men for men doesn't work for men either. It is making none of us happy. In *Man Down* Matt Rudd takes the long view on this perplexing paradox. Drawing on stories from his own life and the varied lives of the other men he has interviewed, he goes back to the beginning to consider what makes the modern man tick. How the seeds of midlife misery are sown in the school playground and cultivated through adolescence and into adulthood. By turns compassionate and provocative, *Man Down* asks the important question: is midlife unhappiness inevitable? Spoiler alert: it isn't.

Antitrust After Microsoft David B.

Kopel, 2001. Kopel, a researcher for the Heartland Institute, draws lessons from the Microsoft case and applies them to anti-trust laws on the whole. He describes the impact of emerging technologies, the shifts created by new competitors, the details of the Microsoft case and its relationship to business practices and politics. His argument is deeply suspicious of government regulation of business, especially the regulation of communication technology.
