2013 14 school years Prominent among these possible factors are the introduction of Common Core instruction and Common Core versions of MAP But as with all empirical studies changes in scope and data necessitated changes in statistical design and analyses The methodological improvements introduced in the 2015 norms have resulted in a set of norms that are more representative of the US school age population than previous NWEA norms Methodological changes involved differences in the way post stratification weights were developed and the way growth was modeled Details of these changes are addressed more thoroughly in the 2015 Norms Study As a result of the improved methodology partners can expect some differences from previous norms as explained below
