Marketing Case Studies in Emerging Markets Dilip S. Mutum,Soo Yeong Ewe,Ezlika M. Ghazali,Racheal Louis Vincent,2024-04-01 There is an increasing interest in emerging markets because of the higher economic growth rates compared to developed economies However these markets have a diverse consumer base with unique needs and preferences As a result companies in these markets face different challenges and opportunities Unfortunately there is a lack of marketing cases from these markets This book presents actual real world marketing cases in these markets offering an in depth look at some of the issues faced by companies in different industries It is hoped that the cases would serve as valuable reference material for academics students professionals in marketing business strategy and other related fields as well as policymakers to better understand the challenges of these markets and develop strategies to succeed in them

Riding the Energy Transition Reda Cherif,Fuad Hasanov,Aditya Pande,2017-05-22 Recent technological developments and past technology transitions suggest that the world could be on the verge of a profound shift in transportation technology The return of the electric car and its adoption like that of the motor vehicle in place of horses in early 20th century could cut oil consumption substantially in the coming decades Our analysis suggests that oil as the main fuel for transportation could have a much shorter life span left than commonly assumed In the fast adoption scenario oil prices could converge to the level of coal prices about 15 per barrel in 2015 prices by the early 2040s In this possible future oil could become the new coal

Global Marketing Management
Masaaki (Mike) Kotabe,Kristiaan Helsen,2020-01-09 Global Marketing Management 8th Edition combines academic rigor

contemporary relevance and student friendly readability to review how marketing managers can succeed in the increasingly competitive international business environment. This in depth yet accessible textbook helps students understand state of the art global marketing practices and recognize how marketing managers work across business functions to achieve overall corporate goals. The author provides relevant historical background and offers logical explanations of current trends based on information from marketing executives and academic researchers around the world. Designed for students majoring in business this thoroughly updated eighth edition both describes today's multilateral realities and explores the future of marketing in a global context. Building upon four main themes the text discusses marketing management in light of the drastic changes the global economy has undergone: the explosive growth of information technology and e-commerce; the economic and political forces of globalization; and the various consequences of corporate action such as environmental pollution, substandard food safety and unsafe work environments. Each chapter contains review and discussion questions to encourage classroom participation and strengthen student learning.

Non-Petroleum Automotive Transportation Carl Arthur MacCarley, 2025-07-17 Non Petroleum Automotive Transportation addresses the broad topic of energy and environmental sustainability for automotive transportation in a balanced, comprehensive and readable way. Readers will gain a basic understanding of the characteristics, advantages and limitations of all viable alternatives to fossil fuels as well as the basics of internal combustion engines. Fuels include ethanol, methanol, hydrogen, biodiesel, biomethane, natural gas, ammonia, dimethyl ether and synthetic e-fuels. Methods to calculate the carbon emissions and power output limits for each are covered. The technologies, operation efficiency and overall emissions of battery electric, hybrid electric and hydrogen fuel cell vehicles will be analyzed and compared with all other vehicle fueling options. Also covered are the fueling and charging infrastructure challenges, energy resource requirements, indirect environmental impacts, safety and economic ramifications of the transition from gasoline and diesel fuel to electric and renewable fuels. The interdependence of transportation with solar, wind, electric energy storage and emerging renewable energy sources is discussed. The book concludes with an overview of the effect of incentives and carbon credits on the direction of automotive energy and suggestions for future career and investment opportunities enabled by this revolution.

Definition and Market Analysis of the Tesla Motors Model S Erik Somssich, 2017-04-04 Seminar paper from the year 2016 in the subject Business economics / Offline Marketing and Online Marketing grade 1.3 University of applied sciences Cologne course Marketing language English abstract: The purpose of this document is to analyse the strategic marketing positioning of Tesla Motors with the focus on its premium electric car Model S. From the text: The Company Tesla Motors Business Analysis Market Analysis Market Positioning and Strategy. **The Dynamics of Plug-in Electric Vehicles in the Secondary Market and Their Implications for Vehicle Demand, Durability, and Emissions** Thomas Turrentine, Gil Tal, David Rapson, 2018 **Ludicrous** Edward Niedermeyer, 2019-08-20 Tesla is the most exciting car company in a generation but can it live up to the hype? Tesla Motors and CEO Elon Musk have become household

names shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom. The company's market valuation now rivals that of long established automakers and to many industry observers Tesla is defining the future of the industry. But behind the hype Tesla has some serious deficiencies that raise questions about its sky high valuation and even its ultimate survival. Tesla's commitment to innovation has led it to reject the careful zero defects approach of other car manufacturers even as it struggles to mass produce cars reliably and with minimal defects. While most car manufacturers struggle with the razor thin margins of mid priced sedans, Tesla's strategy requires that the Model 3 finally bring it to profitability even as the high priced Roadster and Model S both lost money. And Tesla's approach of continually focusing on the future even as commitments and deadlines are repeatedly missed may ultimately test the patience of all but its most devoted fans. In *Ludicrous*, journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day to day realities of the company and the cars it produces. Blending original reporting and never before published insider accounts with savvy industry analysis, Niedermeyer tells the story of Tesla as it's never been told before with clear eyes, objectivity and insight. Impact of digital transformation on business models in the automotive industry Robin Mayer, 2023-06-12 Master's Thesis from the year 2023 in the subject Engineering Automotive Engineering grade 1.5 University of Applied Sciences Aalen language English abstract: Digital transformation and disruptive business models of new market players create unprecedented uncertainty in the automotive industry. One of the main reasons is the lack of understanding for the need of adapting business models to a changing business environment due to new technologies and shifting customer wants and needs. Even the automotive industry is not spared from digital Darwinism according to which it is not the strongest or most intelligent of a species that survives but rather the one that adapts best to change. What opportunities do OEMs have to transform their business models? How can best practices be used to generate new value creation and what influence does the transformation of the business model have on the ecosystem? What role will the dealer play in the future and how can he still deliver added value to the OEM? This paper provides an in depth insight into the world of automotive sales as well as a detailed analysis of the status quo. Best practices based on successful business model transformations of the top tier OEMs are the basis for a deeper understanding and serve other companies as foundation for developing digital business models. The goal of this paper is to examine the impact of digital transformation on the dealer business model and how they can continue to deliver value to the OEM. For this purpose guided expert interviews are conducted with 16 experts from various areas of the automotive industry. Subsequently a qualitative content analysis according to Mayring will be used to assess the challenges and impacts of the agent business model and to develop improvement measures and key topics that offer added value for OEMs. The results of this thesis support dealers in understanding their future role in the automotive industry and
