**Advanced Medicine Recall** James D. Bergin, 2009 Advanced Medicine Recall is written primarily for fourth year medical students sub interns and interns. It expands upon the core clinical specialty areas within internal medicine: cardiology, pulmonology, nephrology, gastroenterology, hematology, oncology, infectious disease, endocrinology, allergy, and immunology, rheumatology, neurology, and dermatology. This book is written in the rapid fire question and answer format of the Recall Series with the question on the left side of the page and the answer on the right. Mnemonics are interspersed throughout. Additional chapters in Advanced Medicine Recall include Environmental Medicine, Psychiatry, and The Consultant. The focus of the advanced material is on differential diagnosis, patient management, and disease management.

**Emergency Medicine Recall** William A. Woods, Jeffrey Seth Young, Joseph Scott Just, 2000 Emergency Medicine Recall is an important addition to the successful RECALL series which uses a double column rapid fire question and answer format to help medical students, residents, nurse practitioners, physician assistants, and other healthcare professionals to recall important information presented on wards. This information also is critical for USMLE test preparation. The text contains many patient management questions that are written in the emergency room setting, thus preparing students for questions that address EM specific issues.

The question and answer format will greatly assist readers in rapidly reviewing and recalling high yield information for COMLEX examinations and hospital and office rotations. Osteopathic Medicine Recall begins with the most basic concepts in osteopathic medicine followed by a section on the axial and appendicular spine, the core of osteopathic medicine. Subsequent chapters present high yield information on specific body areas and treatment modalities. References following each question direct readers to texts for in depth explanations.

**Saint-Frances Guide to Outpatient Medicine** Craig Frances, Stephen Bent, Sanjay Saint, 1999-11-01 The Saint Frances Guide to Outpatient Medicine was prepared and written by chief residents for third and fourth year medical students and residents. The use of mnemonics, tables, and algorithms makes the text a user friendly, quick reference resource. This pocket sized review provides up to date information that can be used while seeing patients in the examination room because each condition is covered concisely yet thoroughly. Therefore, a quick review of the topic takes only a few minutes. The text also serves as an excellent study guide in preparation for the USMLE.
